

## CUMULATIVE AUTHOR INDEX, 2001

- Abbott, Andrew P., 1892  
 Abdel-Ghani, N. T., 79  
 Abdel-Hamid, Mohammed E., 609  
 Achene, L., 1942  
 Agnelli, D., 2149  
 Agüera, Ana, 46  
 Agulló, Josep, 371  
 Akutsu, Kazuhiko, 1529  
 Al-Hassawi, Nada A., 609  
 Alañón Molina, Aurelia, 234  
 Alañón Pardo, María Teresa, 234  
 Albertús, Fernando, 903  
 Alegret, S., 1551  
 Aleixo, Luiz M., 892  
 Allen, Stephanie, 1100  
 Alonso Chamero, J., 501  
 Amici, Marina, 144  
 Analytical, Methods Committee, 256, 953  
 Andrade-Eiroa, A., 451  
 Andrade, F., 394  
 Andres, Roberto, 1469  
 Andrews, Anthony R. J., 1298  
 Andrey, Daniel, 985  
 Angel, S. Michael, 1499  
 Aoyama, Tetsuya, 465  
 Appel, M. F., 1221  
 Arancibia, Juan A., 917  
 Ariese, Freek, 1418  
 Ariño, Cristina, 371  
 Armitage, David A., 1100  
 Arnaud, Nadine, 694  
 Armhold, Jürgen, 1042  
 Arnold, Klaus, 1042  
 Arreola, F. J., 1355  
 Atkinson, Dean B., 1216  
 Avila-Pérez, P., 501  
 Bäckman, Christina, 641  
 Balamurugan, Krishnaswamy, 1409  
 Baldock, Sara J., 433  
 Bănică, Florinel Gabriel, 1907  
 Barceló, D., 825  
 Barker, George W., 1892  
 Barnett, Neil W., 1636  
 Barrett, Christopher J., 1861  
 Barrio, Ramón J., 495  
 Barro, S., 97, 2186  
 Basic-Dvorzak, Marija, 985  
 Basran, Amrik, 329  
 Batish, A., 1958  
 Bayouth, Sami, 784  
 Beardah, Matthew S., 1689  
 Beattie, John H., 2225  
 Becerra, Eduardo, 903  
 Beckett, Emma L., 1897  
 Beckett, Ronald, 1588  
 Bell, Steven E. J., 1  
 Beltrán, José-Luis, 1149  
 Benedetti, Simona, 1466  
 Benter, Th., 1221  
 Berg, Michael, 405  
 Berggren, Christine, 784  
 Bermejo, Adela, 571  
 Bermejo, Pilar, 571  
 Berrettoni, Mario, 2168  
 Bharathi, S., 1919  
 Bhat, Ramesh V., 179  
 B'Hymer, Clayton, 136  
 Bi, Shuping, 1404  
 Billon, G., 1805  
 Bird, David J., 1936  
 Blais, Jocelyne, 923  
 Blanco, M., 378, 1129, 2212  
 Blöchl, Andrea, 1912  
 Bo, Wu, 1440  
 Bobin, S., 1996  
 Bocos-Bintintan, Victor, 1539  
 Bonet-Domingo, E., 91  
 Bonnaire, Y., 1996  
 Bordin, G., 2178

## SUBJECT INDEX, 2001

**5-FLUOROURACIL**

Synthesis of 5-fluorouracil-imprinted polymers with multiple hydrogen bonding interactions, 772

**10-HYDROXYBENZO[h]QUINOLINE-7-SULFONATE**

A novel fluorescence reagent, 10-hydroxybenzo[h]quinoline-7-sulfonate, for selective determination of beryllium(II) ion at  $\text{pg cm}^{-3}$  levels, 2082

**3Q-TOCOPHEROL**

Determination of aliphatic alcohols, squalene,  $\alpha$ -tocopherol and sterols in olive oils: direct method involving gas chromatography of the unsaponifiable fraction following silylation, 472

**ACCELERATOR MASS SPECTROMETRY**

Measurement of  $^{237}\text{Np}$  in environmental water samples by accelerator mass spectrometry, 58

**ACETIC ACID**

Two-parameter determination in vinegar by a flow injection-pervaporation system, 1177

**ACETONITRILE**

Determination of acetonitrile and ethanol in water by guided microwave spectroscopy with multivariate calibration, 417

**ACETYLCHOLINE**

Cyclodextrin-modified biosensors: comparison of cyclodextrin-linked ferrocenes as mediators in sol-gel and screen-printed formats for sensing acetylcholine, 2015

**ACOUSTIC WAVE SENSOR**

Electrode modification and the response of the acoustic shear wave device operating in liquids, 2159

**ACTINIDES**

Extraction chromatographic separations and analysis of actinides using sequential injection techniques with on-line inductively coupled plasma mass spectrometry (ICP MS) detection, 1594

**ADENOSINE TRIPHOSPHATE**

Chemiluminescence detection of ATP release from red blood cells upon passage through microbore tubing, 1257

**ADSORBABLE ORGANIC HALOGEN**

Use of the correct blank test in the determination of COD and AOX in bleached kraft mill D stage effluents, 127

**ADSORBENT**

Application of chemometric techniques to the characterisation of impregnated materials obtained following supercritical fluid technology, 1792

**ADSORPTION**

Determination of  $^{226}\text{Ra}$  in biological samples by adsorption on specific adsorbents, 399

**ADSORPTION VOLTAMMETRY**

Carbon paste electrode for trace zirconium(IV) determination by adsorption voltammetry, 2032

**AFLATOXINS**

Quantification and validation of enzyme immunoassay for urinary aflatoxin B<sub>1</sub>-N<sup>7</sup>-guanine adduct for biological monitoring of aflatoxins, 179

Detection of aflatoxins (G<sub>1-2</sub>, B<sub>1-2</sub>), sterigmatocystin, citrinine and ochratoxin A in samples contaminated by microbes, 1545

**AIR**

A new fluorimetric method for the determination of formaldehyde in air based on the liquid droplet sampling technique, 104

Determination of morpholine in air by derivatisation with 1-naphthylisothiocyanate and HPLC analysis, 152

Automated measurement system for H<sub>2</sub>O<sub>2</sub> in the atmosphere by diffusion scrubber sampling and HPLC analysis of Ti(IV)-PAR-H<sub>2</sub>O<sub>2</sub> complex, 587

Determination of airborne formaldehyde by active sampling on 3-methyl-2-benzothiazolinone hydrazone hydrochloride-coated glass fibre filters, 720

Exposure to 2,4- and 2,6-toluene diisocyanate (TDI) during production of flexible foam: determination of airborne TDI and urinary 2,4- and 2,6-toluenediamine (TDA), 1025

A portable pulsed cavity ring-down transmissometer for measurement of the optical extinction of the atmospheric aerosol, 1216

Detection of chlorinated methanes by tin oxide gas sensors, 1382

A novel nano-Au-assembled gas sensor for atmospheric oxygen determination, 1747

Formation of artefacts during air analysis of volatile amines by solid-phase micro extraction, 1969

Multivariate evaluation of factors influencing the performance of a formic acid biosensor for use in air monitoring, 2008

**ALCOHOLS**

Headspace extraction of alcohols into a single drop, 1674

**ALIPHATIC ALCOHOL**

Determination of aliphatic alcohols, squalene,  $\alpha$ -tocopherol and sterols in olive oils: direct method involving gas chromatography of the unsaponifiable fraction following silylation, 472

**ALKALI METALS**

Evaluation of column temperature as a means to alter selectivity in the

cation exchange separation of alkali metals, alkaline earth metals and amines, 2113

**ALKALINE EARTH METALS**

Evaluation of column temperature as a means to alter selectivity in the cation exchange separation of alkali metals, alkaline earth metals and amines, 2113

**ALKALINITY**

A novel ion chromatographic method based on cation-exchange and acid-base interactions for the simultaneous determination of total alkalinity and monovalent cations in samples of  $\mu\text{l}$  volume, 555

**ALKALOIDS**

Tris(2,2'-bipyridine)ruthenium(II) electrogenerated chemiluminescence of alkaloid type drugs with solid phase extraction sample preparation, 37

**ALUMINIUM**

Improved fluorimetric determination of dissolved aluminium by micelle-enhanced lumogallion complex in natural waters, 698

Preparation of microporous aluminium anodic oxide film modified Pt nano array electrode and application in direct measurement of nitric oxide release from myocardial cells, 871

Spectrophotometric determination of trace aluminium content in parenteral solutions by combined cloud point preconcentration-flow injection analysis, 1172

Speciation of aluminium(III) in natural waters using differential pulse voltammetry with a Pyrocatechol Violet-modified electrode, 1404

Development of SdFFF-ETAAS for characterising soil and sediment colloids, 1588

**ALUMINOSILICATE**

Analysis of luminescence spectra of leucite (KAlSiO<sub>4</sub>), 911

**AMBERSORB 572**

The determination of six taste and odour compounds in water using Ambersorb 572 and high resolution mass spectrometry, 840

**AMINES**

Simultaneous determination of ammonia, aliphatic amines, aromatic amines and phenols at  $\mu\text{g l}^{-1}$  levels in environmental waters by solid-phase extraction of their benzoyl derivatives and gas chromatography-mass spectrometry, 1663

Determination of aliphatic amines in water by liquid chromatography using solid-phase extraction cartridges for preconcentration and derivatization, 1683

Calculation of the electrophoretic mobility of amines in methanol-aqueous electrolyte systems, 1958

Formation of artefacts during air analysis of volatile amines by solid-phase micro extraction, 1969

Evaluation of column temperature as a means to alter selectivity in the cation exchange separation of alkali metals, alkaline earth metals and amines, 2113

Determination of biogenic amines in wine by multidimensional liquid chromatography with online derivatisation, 2124

**AMINO ACID**

Amino acid quantitation in aqueous matrices *via* trap and release membrane introduction mass spectrometry: homocysteine in human plasma, 1212

Enantioseparation of chiral amino acids as the *N*-(*O*,*S*)-ethoxycarbonylated diastereomeric esters by achiral dual-capillary column gas chromatography, 2128

**AMINOPYRINE**

A piezoelectric biomimetic sensor for aminopyrine with a molecularly imprinted polymer coating, 664

**AMMONIA**

Micro sequential injection: fermentation monitoring of ammonia, glycerol, glucose, and free iron using the novel lab-on-valve system, 291

Simultaneous determination of ammonia, aliphatic amines, aromatic amines and phenols at  $\mu\text{g l}^{-1}$  levels in environmental waters by solid-phase extraction of their benzoyl derivatives and gas chromatography-mass spectrometry, 1663

**AMMONIUM ION**

High-resolution determination of H<sup>+</sup> by ion chromatography. Application to the simultaneous determination of H<sup>+</sup>, Na<sup>+</sup>, NH<sub>4</sub><sup>+</sup> and K<sup>+</sup> in acid rain, 821

**AMPEROMETRY**

A two-electrode configuration for simplified amperometric detection in a microfabricated electrophoretic separation device, 147

On-column amperometric detection of ofloxacin and pasiniazid in urine by capillary electrophoresis with an improved fractured joint and small detection cell, 441

Multimembrane carbon fiber microelectrodes for amperometric determination of serotonin in human urine, 495

Influence of gamma irradiation on a natural source of peroxidase and its effect in the reagentless amperometric biosensor for hydrogen peroxide, 739

Flow injection analysis of *L*-lactate in milk and yoghurt by on-line

- microdialysis and amperometric detection at a disposable biosensor, 866
- Determination of ascorbyl 6-palmitate in food matrices by amperometric flow injection analysis, 1466
- Separation and determination of protocatechuic aldehyde and protocatechuic acid in *Salvia miltiorrhiza* by capillary electrophoresis with amperometric detection, 1519
- Amperometric tyrosinase biosensor based on a sol-gel-derived titanium oxide-copolymer composite matrix for detection of phenolic compounds, 1728
- AMPHETAMINES**
- Sensitive determination of methylenedioxylated amphetamines by liquid chromatography, 581
- Application of SERS spectroscopy to the identification of (3,4-methylenedioxy)amphetamine in forensic samples utilizing matrix stabilized silver halides, 2066
- ANION**
- Successive non-suppressed ion chromatography of common cations and anions using dual columns with single eluent, 989
- Cationic diazacrown ethers as selectors for the separation of inorganic anions by capillary electrophoresis, 2110
- Simultaneous ion chromatographic separation of anions and cations on poly(aspartic acid) functionalized silica, 2119
- ANION EXCHANGE**
- Microwave-assisted extraction of monomethyl arsonic acid from soil and sediment standard reference materials, 1511
- ANIONIC SURFACTANT**
- X-ray fluorescence spectrometric determination of sulfur-containing anionic surfactants in water after their enrichment on a membrane filter as an ion-pair complex with a cationic surfactant, 2078
- ANODIC-STRIPPING VOLTAMMETRY**
- Nanocomposite electrodes made of carbon nanofibers and black wax. Anodic stripping voltammetry of zinc and lead, 1878
- ANTIBIOTICS**
- A new electrochemical enzyme-linked immunosorbent assay for the screening of macrolide antibiotic residues in bovine meat, 1942
- Efficient and sensitive screening and confirmation of residues of selected polyether ionophore antibiotics in liver and eggs by liquid chromatography-electrospray tandem mass spectrometry, 1990
- ANTI-HISTAMINE**
- Chromatographic analysis of phenethylamine-antihistamine combinations using  $C_{18}$ ,  $C_{18}$  or cyano columns and micellar sodium dodecyl sulfate-pentanol mixtures, 457
- ANTIOXIDANT**
- Monoparameter sensors for the determination of the antioxidants butylated hydroxyanisole and n-propyl gallate in foods and cosmetics by flow injection spectrophotometry, 897
- APPLES**
- An evaluation of extraction techniques for arsenic species from freeze-dried apple samples, 136
- AROMATIC AMINES**
- Simultaneous determination of ammonia, aliphatic amines, aromatic amines and phenols at  $\mu\text{g l}^{-1}$  levels in environmental waters by solid-phase extraction of their benzoyl derivatives and gas chromatography-mass spectrometry, 1663
- ARSENIC**
- An evaluation of extraction techniques for arsenic species from freeze-dried apple samples, 136
- Application of central composite designs for optimisation of the chromatographic separation of monomethylarsenate and dimethylarsinate and of selenomethionine and selenite by ion-pair chromatography coupled with plasma mass spectrometric detection, 594
- Arsenic extraction and speciation in carrots using accelerated solvent extraction, liquid chromatography and plasma mass spectrometry, 1011
- Investigation of arsenic speciation in oyster test reference material by multidimensional HPLC-ICP-MS and electrospray tandem mass spectrometry (ES-MS-MS), 1055
- Microwave-assisted extraction of monomethyl arsonic acid from soil and sediment standard reference materials, 1511
- ARTIFICIAL NEURAL NETWORKS**
- Determination of physical properties of bitumens by use of near-infrared spectroscopy with neural networks. Joint modelling of linear and non-linear parameters, 378
- Application of artificial neural networks to the classification of soils from São Paulo state using near-infrared spectroscopy, 2194
- ARTIFICIAL RECEPTOR**
- Towards the development of molecularly imprinted artificial receptors for the screening of estrogenic chemicals, 760
- ASCORBIC ACID**
- Covalent modification of glassy carbon electrode with glutamic acid for simultaneous determination of uric acid and ascorbic acid, 367
- Selective determination of dopamine in the presence of ascorbic acid at an over-oxidized poly(N-acetylaniline) electrode, 736
- Fluorimetric determination of total ascorbic acid by a stopped-flow mixing technique, 1436
- Separation of anodic peaks of ascorbic acid and dopamine at an  $\alpha$ -alanine covalently modified glassy carbon electrode, 1760
- Potentiometric titrations using dual microband electrodes, 1882
- ASCORBYL 6-PALMITATE**
- Determination of ascorbyl 6-palmitate in food matrices by amperometric flow injection analysis, 1466
- ATMOSPHERIC PRESSURE CHEMICAL IONIZATION**
- Determination of linezolid in human plasma by LC-MS-MS, 609
- Regiospecific characterisation of the triacylglycerols in animal fats using high performance liquid chromatography-atmospheric pressure chemical ionisation mass spectrometry, 1018
- ATOMIC ABSORPTION SPECTROMETRY**
- Characterization of Galician (N.W. Spain) quality brand potatoes: a comparison study of several pattern recognition techniques, 97
- Sampling of kidneys from cattle and pigs for cadmium analysis, 114
- Determination of manganese in water samples by flame atomic absorption spectrometry after cloud point extraction, 534
- Copper fractionation by SEC-HPLC and ETAAS: Study of breast milk and infant formulae whey used in lactation of full-term newborn infants, 571
- Field sample preconcentration of copper in sea water using chelating minicolumns subsequently incorporated on a flow-injection-flame atomic absorption spectrometry system, 933
- Potential for the speciation of Zn using fast protein liquid chromatography (FPLC) and convective interaction media (CIM) fast monolithic chromatography with FAAS and electrospray (ES)-MS-MS detection, 1346
- Principle of synchronous multistage dispersion sampling and its applications in the continuous determination of components of concentrated and viscous liquid mixtures by atomic absorption spectrometry, 1602
- Study of matrix influence on supercritical fluid extraction of polar mercury species from solid samples, 1694
- ATOMIC EMISSION SPECTROMETRY**
- Characterization of Galician (N.W. Spain) quality brand potatoes: a comparison study of several pattern recognition techniques, 97
- The influence of chlorine on the intensity of metal atomic lines emitted by an electrolyte cathode atmospheric glow discharge, 712
- Speciation and preconcentration of vanadium(V) and vanadium(IV) in water samples by flow injection-inductively coupled plasma optical emission spectrometry and ultrasonic nebulization, 715
- ATOMIC FLUORESCENCE SPECTROMETRY**
- Microwave treatment of biological samples for methylmercury determination by high performance liquid chromatography-cold vapour atomic fluorescence spectrometry, 1583
- ATOMIC LINES**
- The influence of chlorine on the intensity of metal atomic lines emitted by an electrolyte cathode atmospheric glow discharge, 712
- ATTENUATED TOTAL REFLECTANCE**
- Determination of carbonate in marine solid samples by FTIR-ATR spectroscopy, 144
- Development of an SPME/ATR-IR chemical sensor for detection of phenol type compounds in aqueous solutions, 881
- AZOBENZENE**
- Stable sensor layers self-assembled onto surfaces using azobenzene-containing polyelectrolytes, 1861
- BEAD LOADING**
- Analysis of single polymer beads for solid phase combinatorial synthesis: the determination of reactive thiol and within batch polydispersity of bead loadings, 538
- BENZENE**
- Electric field-induced mobilisation of multiphase solution systems based on the nitration of benzene in a micro reactor, 14
- Determination of low concentrations of benzene in urine using multi-dimensional gas chromatography, 41
- BENZENESULFONATES**
- Large-volume sample stacking for on-capillary sample enrichment in the determination of naphthalene- and benzenesulfonates in real water samples by capillary zone electrophoresis, 1312
- BENZO(A)PYRENE**
- Fast sequential injection determination of benzo(a)pyrene using variable angle fluorescence with on-line solid-phase extraction, 451
- BERYLLIUM**
- A novel fluorescence reagent, 10-hydroxybenzo[h]quinoline-7-sulfonate, for selective determination of beryllium(II) ion at  $\text{pg cm}^{-3}$  levels, 2082
- BERYLLON II**
- Study of the reaction of proteins with Beryllon II-Al<sup>III</sup> by the Rayleigh light scattering technique and its application, 707
- BIOCHEMICAL**
- Assessment of the fifth ligand-binding repeat (LR5) of the LDL receptor as an analytical reagent for LDL binding, 329
- BIOCHEMICAL OXYGEN DEMAND**
- Monitoring of the composting process using a mediator-type biochemical oxygen demand sensor, 1751
- BIOLOGICAL**
- Multi-residue analysis of avermectins and moxidectin by ion-trap LC-MS<sup>n</sup>, 155
- Determination of  $^{226}\text{Ra}$  in biological samples by adsorption on specific adsorbents, 399
- On-column amperometric detection of ofloxacin and pasiniazid in urine by capillary electrophoresis with an improved fractured joint and small detection cell, 441

- Copper fractionation by SEC-HPLC and ETAAS: Study of breast milk and infant formulae whey used in lactation of full-term newborn infants, 571
- A microbiological six-plate method for the identification of certain antibiotic groups in incurred kidney and muscle samples, 641
- Inorganic biological analysis by capillary electrophoresis, 964
- A capillary zone electrophoretic method for the study of formation of a covalent conjugate between microcystin LR and protein phosphatase 2A, 1001
- Investigation of arsenic speciation in oyster test reference material by multidimensional HPLC-ICP-MS and electrospray tandem mass spectrometry (ES-MS-MS), 1055
- Diffusion and calibration properties of microdialysis sampling membranes in biological media, 1261
- Biological sample analysis with immunoaffinity solid-phase microextraction, 1456
- Development and validation of a method for the confirmation of nicarbazin in chicken liver and eggs using LC-electrospray MS-MS according to the revised EU criteria for veterinary drug residue analysis, 1985
- BIOLOGICAL MATERIALS**
- Sampling of kidneys from cattle and pigs for cadmium analysis, 114
- Development of a procedure for measuring nitrogen by cold neutron prompt gamma-ray activation analysis, 217
- Direct determination of naphthol by non-protected fluid room temperature phosphorescence, 234
- Small volume bead assay for ovalbumin with electrochemical detection, 337
- The preparation, solubilisation and binding characteristics of a  $\beta$ 2-adrenoceptor isolated from transfected Chinese hamster cells, 491
- Multimembrane carbon fiber microelectrodes for amperometric determination of serotonin in human urine, 495
- Development and optimisation of an improved derivatisation procedure for the determination of avermectins and milbemycins in bovine liver, 576
- Determination of linezolid in human plasma by LC-MS-MS, 609
- Analysis of badger urine volatiles using gas chromatography-mass spectrometry and pattern recognition techniques, 615
- A method for the measurement of catechol-*O*-methyltransferase activity using norepinephrine, an endogenous substrate, 637
- A microbiological six-plate method for the identification of certain antibiotic groups in incurred kidney and muscle samples, 641
- Sensitive detection of tetracyclines using europium-sensitized fluorescence with EDTA as co-ligand and cetyltrimethylammonium chloride as surfactant, 694
- Evaluation of methods aimed at complete removal of template from molecularly imprinted polymers, 784
- Detection of ferricyanide as a probe for the effect of hematocrit in whole blood biosensors, 861
- A direct sensitized fluorimetric determination of 5,10,15,20-tetra(*m*-hydroxyphenyl)chlorin [*m*-THPC (Foscan)®] in human plasma using a cyclodextrin inclusion complex, 923
- Regiospecific characterisation of the triacylglycerols in animal fats using high performance liquid chromatography-atmospheric pressure chemical ionisation mass spectrometry, 1018
- Spectrophotometric determination of trace molybdenum in plants and seeds with 3,5-dibromo-4-hydroxyphenylfluorene, 1154
- Chemiluminescence detection of ATP release from red blood cells upon passage through microbore tubing, 1257
- Simultaneous determination of morphine and its glucuronides in rat hair and rat plasma by reversed-phase liquid chromatography with electrospray ionization mass spectrometry, 1339
- Determination of Ba, Cd, Cu, Pb and Zn in saliva by isotope dilution direct injection inductively coupled plasma mass spectrometry, 1363
- BIOSENSOR**
- High sensitivity microgravimetric biosensor for qualitative and quantitative diagnostic detection of polychlorinated dibenzo-*p*-dioxins, 71
- Integration of microfabricated needle-type glucose sensor devices with a novel thin-film Ag/AgCl electrode and plasma-polymerized thin film: mass production techniques, 658
- Influence of gamma irradiation on a natural source of peroxidase and its effect in the reagentless amperometric biosensor for hydrogen peroxide, 739
- Flow injection analysis of L-lactate in milk and yoghurt by on-line microdialysis and amperometric detection at a disposable biosensor, 866
- On-line continuous monitoring of glucose or lactate by ultraslow microdialysis combined with a flow-through nanoliter biosensor based on poly(*m*-phenylenediamine) ultra-thin polymer membrane as enzyme electrode, 1073
- Optical biosensors based on Prussian Blue films, 1080
- An unmediated hydrogen peroxide biosensor based on hemoglobin incorporated in a montmorillonite membrane, 1086
- Optical fibre biosensors based on immobilised enzymes, 1469
- An optical glucose biosensor with eggshell membrane as an enzyme immobilisation platform, 1558
- Spectrophotometric bioanalytical flow-injection system for control of hemodialysis treatment, 1564
- Sensor chip preparation and assay construction for immunobiosensor determination of beta-agonists and hormones, 1721
- Amperometric tyrosinase biosensor based on a sol-gel-derived titanium oxide-copolymer composite matrix for detection of phenolic compounds, 1728
- Methylene blue as an electrochemical discriminator of single- and double-stranded oligonucleotides immobilised on gold substrates, 1756
- A glucose biosensor based on electrodeposited biocomposites of gold nanoparticles and glucose oxidase enzyme, 1919
- Multivariate evaluation of factors influencing the performance of a formic acid biosensor for use in air monitoring, 2008
- Cyclodextrin-modified biosensors: comparison of cyclodextrin-linked ferrocenes as mediators in sol-gel and screen-printed formats for sensing acetylcholine, 2015
- Pulse mode operation of Love wave devices for biosensing applications, 2107
- BISMUTH**
- Flow injection manifold for the direct spectrophotometric determination of bismuth in pharmaceutical products using Methylthymol Blue as a chromogenic reagent, 247
- Optimization of the simultaneous batch determinations of Bi(III), Hg(II) and Cu(II) at an epoxy-graphite electrode bulk modified with 2-mercaptobenzothiazole, 2172
- BITUMEN**
- Determination of physical properties of bitumens by use of near-infrared spectroscopy with neural networks. Joint modelling of linear and non-linear parameters, 378
- BLOOD**
- Fluorimetric determination of isatin in human urine and serum by liquid chromatography postcolumn photoradiation, 33
- Blood platelet adhesion to protein studied by on-line acoustic wave sensor, 342
- Selective extraction of blood plasma exchangeable copper for isotope studies of dietary copper absorption, 2225
- BORATE**
- Characteristics of a column suitable for capacity gradient chromatography with a borate eluent, 465
- BORON**
- 1-(2-hydroxy-3-methoxybenzylideneamino)-8-hydroxynaphthalene-3,6-disulfonic acid as a reagent for the spectrophotometric determination of boron in ceramic materials, 1160
- BOUNDARY LAYER LUBRICANTS**
- Spectroscopic analysis of the tribological behavior of a model boundary layer lubricant, 1269
- CADMIUM**
- Sampling of kidneys from cattle and pigs for cadmium analysis, 114
- Simultaneous determination of Cd(II), Cu(II) and Pb(II) in surface waters by solid phase extraction and flow injection analysis with spectrophotometric detection, 1149
- Determination of Ba, Cd, Cu, Pb and Zn in saliva by isotope dilution direct injection inductively coupled plasma mass spectrometry, 1363
- Preconcentration of trace amounts of cadmium in aqueous samples on minicolumns packed with Chromosorb series gas chromatographic stationary phases and its determination by electrothermal atomic absorption spectrometry, 1678
- CALCIUM CARBONATE**
- Quantitative determination of binary and tertiary calcium carbonate mixtures using powder X-ray diffraction, 1118
- CALIBRATION**
- Diffusion and calibration properties of microdialysis sampling membranes in biological media, 1261
- Statistical and probabilistic approaches to confidence intervals of linear calibration in liquid chromatography, 2061
- CAPACITY GRADIENT ELUTION**
- Characteristics of a column suitable for capacity gradient chromatography with a borate eluent, 465
- CAPILLARY COLUMN GAS CHROMATOGRAPHY**
- Enantioseparation of chiral amino acids as the *N*-(*O,S*)-ethoxycarbonylated diastereomeric esters by achiral dual-capillary column gas chromatography, 2128
- CAPILLARY ELECTROPHORESIS**
- Altering the selectivity of inorganic anion separations using electrostatic capillary electrophoresis, 28
- Carbon paste-based electrochemical detectors for microchip capillary electrophoresis/electrochemistry, 277
- Capillary electrophoresis system with flow injection sample introduction and chemiluminescence detection on a chip platform, 281
- Development of a capillary electrophoresis-77 K luminescence detection system for online spectral identification, 302
- New isoelectric buffers for capillary electrophoresis: *N*-carboxymethylated polyethyleneimine as a macromolecular isoelectric buffer, 421
- Microchip separations of transition metal ions *via* LED absorbance detection of their PAR complexes, 429
- Enantioselective separation of epoxides by capillary electrophoresis employing sulfated  $\beta$ -cyclodextrin as chiral selector, 438
- On-column amperometric detection of ofloxacin and pasiniazid in urine by capillary electrophoresis with an improved fractured joint and small detection cell, 441

- UV-detection capillary electrophoresis for benzo[a]pyrene and pyrene following a two-step concentration system using homogeneous liquid-liquid extraction and a sweeping method, 551
- Determination of linear alkylbenzene sulfonates and their polar carboxylic degradation products in sewage treatment plants by automated solid-phase extraction followed by capillary electrophoresis-mass spectrometry, 825
- Inorganic biological analysis by capillary electrophoresis, 964
- Glucose biochip: dual analyte response in connection to two pre-column enzymatic reactions, 1203
- On-line monitoring of electroosmotic flow for capillary electrophoretic separations, 1240
- Conductivity detection for monitoring mixing reactions in microfluidic devices, 1248
- Characterization of DNA-protein complexes by capillary electrophoresis-single molecule fluorescence correlation spectroscopy, 1279
- Separation and determination of protocatechuic aldehyde and protocatechuic acid in *Salvia miltiorrhiza* by capillary electrophoresis with amperometric detection, 1519
- Determination of the active ingredients in *Gastrodia rhizoma* by capillary electrophoresis with electrochemical detection, 1524
- Synchronization of separation and determination based on multichannel mode-filtered light detection with capillary electrophoresis, 1838
- Cationic diazacrown ethers as selectors for the separation of inorganic anions by capillary electrophoresis, 2110
- CAPILLARY-SCALE POLARIMETRY**
- Capillary-scale polarimetry for flowing streams, 673
- CAPILLARY ZONE ELECTROPHORESIS**
- Study of the separation and determination of monosaccharides in soluble coffee by capillary zone electrophoresis with electrochemical detection, 298
- Determination of phytochelatin by capillary zone electrophoresis with electrospray tandem mass spectrometry detection (CZE-ES MS/MS), 624
- A capillary zone electrophoretic method for the study of formation of a covalent conjugate between microcystin LR and protein phosphatase 2A, 1001
- Large-volume sample stacking for on-capillary sample enrichment in the determination of naphthalene- and benzenesulfonates in real water samples by capillary zone electrophoresis, 1312
- Optimisation and validation of a capillary electrophoresis method for the simultaneous determination of diazepam and olonion bromide, 1700
- Calculation of the electrophoretic mobility of amines in methanol-aqueous electrolyte systems, 1958
- Capillary zone electrophoresis for the determination of thiabendazole, prochloraz and procymidone in grapes, 2134
- CARBON**
- Retention characteristics of porous graphitic carbon in reversed-phase liquid chromatography with methanol-water mobile phases, 1318
- CARBON DIOXIDE**
- Effect of dissolved CO<sub>2</sub> on the potential stability of all-solid-state ion-selective electrodes, 2040
- CARBON PASTE ELECTRODE**
- Carbon paste electrode for trace zirconium(IV) determination by adsorption voltammetry, 2032
- CARBONATE**
- Determination of carbonate in marine solid samples by FTIR-ATR spectroscopy, 144
- CARBONIC ANHYDRASE**
- Determination of the complex stability of zinc with carbonic anhydrase in sea-water, 2036
- CATALYSIS**
- Microfabricated reactors for on-chip heterogeneous catalysis, 21
- Continuous and stopped flow injection for catalytic determination of total iodine in urine, 121
- CATALYST**
- A new method for analysis of coke on catalysts, 1669
- CATECHINS**
- Simultaneous determination of twelve tea catechins by high-performance liquid chromatography with electrochemical detection, 816
- CATECHOL-O-METHYLTRANSFERASE**
- A method for the measurement of catechol-O-methyltransferase activity using norepinephrine, an endogenous substrate, 637
- CATHODIC STRIPPING VOLTAMMETRY**
- Catalytic hydrogen evolution in cathodic stripping voltammetry on a mercury electrode in the presence of cobalt(II) ion and phenylthiourea or thiourea, 1907
- CATION**
- Determination of metal cations on miniaturised planar polymeric separation devices using isotachopheresis with integrated conductivity detection, 433
- Successive non-suppressed ion chromatography of common cations and anions using dual columns with single eluent, 989
- Simultaneous ion chromatographic separation of anions and cations on poly(aspartic acid) functionalized silica, 2119
- CAVITY RING-DOWN**
- A portable pulsed cavity ring-down transmissometer for measurement of the optical extinction of the atmospheric aerosol, 1216
- CERAMICS**
- 1-(2-hydroxy-3-methoxybenzylideneamino)-8-hydroxynaphthalene-3,6-disulfonic acid as a reagent for the spectrophotometric determination of boron in ceramic materials, 1160
- CERIUM**
- Chemiluminescence of Ce(IV) and surfactant Tween 20, 553
- CETYLTRIMETHYLAMMONIUM BROMIDE**
- Interaction of morin-cetyltrimethylammonium bromide with nucleic acids and determination of nucleic acids at nanograms per milliliter levels based on the enhancement of preresonance light scattering, 1367
- CHELATION**
- An optimised single-reagent method for the speciation of chromium by flame atomic absorption spectrometry based on surfactant micelle-mediated methodology, 389
- CHEMICAL IONIZATION**
- Gas chromatographic determination of pesticides in vegetable samples by sequential positive and negative chemical ionization and tandem mass spectrometric fragmentation using an ion trap analyser, 46
- Trace level determination of phenols as pentafluorobenzyl derivatives by gas chromatography-negative-ion chemical ionization mass spectrometry, 835
- Negative ion chemical ionization GC/MS-MS analysis of dialkylphosphate metabolites of organophosphate pesticides in urine of non-occupationally exposed subjects, 1037
- Determination of organochlorine pesticides in river water by gas chromatography-negative-ion chemical-ionization mass spectrometry using large volume injection, 1658
- CHEMICAL OXYGEN DEMAND**
- Use of the correct blank test in the determination of COD and AOX in bleached kraft mill D stage effluents, 127
- CHEMILUMINESCENCE**
- Tris(2,2'-bipyridine)ruthenium(II) electrogenerated chemiluminescence of alkaloid type drugs with solid phase extraction sample preparation, 37
- Determination of Co(II) by chemiluminescence after *in situ* electrochemical pre-separation on a flow-through mercury film electrode, 109
- Capillary electrophoresis system with flow injection sample introduction and chemiluminescence detection on a chip platform, 281
- Chemiluminescence of Ce(IV) and surfactant Tween 20, 553
- A method for the measurement of catechol-O-methyltransferase activity using norepinephrine, an endogenous substrate, 637
- Chemiluminescent flow-through sensor for 1,10-phenanthroline based on the combination of molecular imprinting and chemiluminescence, 810
- Chemiluminescence detection of ATP release from red blood cells upon passage through microbore tubing, 1257
- Determination of nitrite by inhibition of the chemiluminescence of acriflavine in a flow-injection assembly, 1423
- Dextran-modified surface for highly sensitive chemiluminescent ELISA, 1633
- Soluble manganese(IV); a new chemiluminescence reagent, 1636
- CHEMOMETRICS**
- Multivariate data analysis of quality parameters in drinking water, 91
- Characterization of Galician (N.W. Spain) quality brand potatoes: a comparison study of several pattern recognition techniques, 97
- Two novel procedures for automatic resolution of two-way data from coupled chromatography, 161
- Response surface modelling and kinetic studies for the experimental estimation of measurement uncertainty in derivatisation, 199
- Process NMR spectrometry, 260
- Implementation of a chemical equilibrium constraint in the multivariate curve resolution of voltammograms from systems with successive metal complexes, 371
- Spectroelectrochemical study of the oxidative doping of polydialkylphenyleneethynylene using iterative target transformation factor analysis, 508
- Analysis of badger urine volatiles using gas chromatography-mass spectrometry and pattern recognition techniques, 615
- Expression of results with uncertainty for the determination of pesticides in melon - experience in a proficiency test, 743
- Uncertainty in sample mass for small numbers of particles from granular materials, 943
- Uncertainty in analyte mass for samples containing small numbers of particles, 947
- Simultaneous optimization of the solid-phase extraction of organochlorine and organophosphorus pesticides using the desirability function, 1005
- Sustained prediction ability of net analyte preprocessing methods using reduced calibration sets. Theoretical and experimental study involving the spectrophotometric analysis of multicomponent mixtures, 1105
- Robust linear regression taking into account errors in the predictor and response variables, 1113
- Influence of the procedure used to prepare the calibration sample set on the performance of near infrared spectroscopy in quantitative pharmaceutical analyses, 1129
- Determination of the content and identity of lidocaine solutions with UV-visible spectroscopy and multivariate calibration, 1142
- Dynamic two-dimensional fluorescence correlation spectroscopy. Generalized correlation and experimental factors, 1229

- Determination of indomethacin polymorphic contents by chemometric near-infrared spectroscopy and conventional powder X-ray diffractometry, 1578
- Modelling measurement uncertainty as a function of concentration: an example from a contaminated land investigation, 1784
- Application of chemometric techniques to the characterisation of impregnated materials obtained following supercritical fluid technology, 1792
- Approach to the determination of insulin-like-growth-factor-I (IGF-I) concentration in plasma by high-performance liquid chromatography-ion trap mass spectrometry: use of a deconvolution algorithm for the quantification of multiprotonated molecules in electrospray ionization, 1996
- Multivariate evaluation of factors influencing the performance of a formic acid biosensor for use in air monitoring, 2008
- Authentication of Galician (N.W. Spain) quality brand potatoes using metal analysis. Classical pattern recognition techniques *versus* a new vector quantization-based classification procedure, 2186
- CHIRALITY**
- Novel polymeric membranes having chiral recognition sites converted from tripeptide derivatives, 775
- Effect of solvent composition on chiral recognition ability of molecularly imprinted DIDE derivatives, 781
- CHLORINATED ETHYLENES**
- Investigation of mechanisms for the reductive dechlorination of chlorinated ethylenes using electroanalytical techniques, 1901
- CHLORINE**
- The influence of chlorine on the intensity of metal atomic lines emitted by an electrolyte cathode atmospheric glow discharge, 712
- The response of a membrane inlet ion mobility spectrometer to chlorine and the effect of water contamination of the drying media on ion mobility spectrometric responses to chlorine, 1539
- o*-Dianisidine: a new reagent for selective spectrophotometric, flow injection determination of chlorine, 2087
- CHLOROBIPHENYLS**
- Evaluation of dialysis as a technique for the removal of lipids prior to the GC determination of *ortho*- and *non-ortho*-chlorobiphenyls, using <sup>14</sup>C-labelled congeners, 829
- CHLOROMETHANES**
- Detection of chlorinated methanes by tin oxide gas sensors, 1382
- CHROMATOGRAPHY**
- Two novel procedures for automatic resolution of two-way data from coupled chromatography, 161
- Fluorescence quenching high-performance thin-layer chromatographic analysis utilizing a scientifically operated charge-coupled device detector, 446
- Phenolics in selected European hardwood species by liquid chromatography-electrospray ionisation mass spectrometry, 1535
- Extraction chromatographic separations and analysis of actinides using sequential injection techniques with on-line inductively coupled plasma mass spectrometry (ICP MS) detection, 1594
- Coupling of organic elemental analysis with flame photometry for sulfur determination at the nanogram level, 1820
- CHROMITITE**
- Simplified method for the determination of Ru, Pd, Re, Os, Ir and Pt in chromitites and other geological materials by isotope dilution ICP-MS and acid digestion, 322
- CHROMIUM**
- An optimised single-reagent method for the speciation of chromium by flame atomic absorption spectrometry based on surfactant micelle-mediated methodology, 389
- Synchronous fluorescence and absorbance dynamic liquid drop sensor for Cr(VI) determination at the femtomole level, 1387
- Separation and preconcentration of chromium species by selective absorption on *Lemna minor* and determination by slurry atomisation electrothermal atomic absorption spectrometry, 1453
- CIPROFLOXACIN**
- Study of the absorption spectra of the 4f electron transitions of the praseodymium complex with ciprofloxacin and its analytical application, 1440
- CLENBUTEROL**
- Evaluation of methods aimed at complete removal of template from molecularly imprinted polymers, 784
- Sensor chip preparation and assay construction for immunobiosensor determination of beta-agonists and hormones, 1721
- COBALT**
- Determination of Co(II) by chemiluminescence after *in situ* electrochemical pre-separation on a flow-through mercury film electrode, 109
- COCAINE**
- Preliminary studies of a fast screening method for cocaine and cocaine metabolites in urine using hollow fibre membrane solvent microextraction (HFMSME), 1298
- COFFEE**
- Study of the separation and determination of monosaccharides in soluble coffee by capillary zone electrophoresis with electrochemical detection, 298
- COLLOIDAL GOLD PARTICLES**
- High-throughput screening using the surface plasmon resonance effect of colloidal gold nanoparticles, 1645
- COLORIMETRY**
- Microwave driven ultraviolet photo-decomposition of organophosphate species, 141
- Colorimetric determination of inorganic iodine in fortified culinary products, 985
- COMPOST**
- Monitoring of the composting process using a mediator-type biochemical oxygen demand sensor, 1751
- COMPUTATIONAL DESIGN**
- Recognition of ephedrine enantiomers by molecularly imprinted polymers designed using a computational approach, 1826
- COMPUTER MODEL**
- Simulation of the microdisc problem in spherical co-ordinates. Application to electrochemiluminescence homogeneous analysis, 1888
- CONCENTRATION GRADIENT**
- The generation of concentration gradients using electroosmotic flow in micro reactors allowing stereoselective chemical synthesis, 11
- CONDUCTIVITY DETECTOR**
- Conductivity detection for monitoring mixing reactions in microfluidic devices, 1248
- COPPER**
- Copper fractionation by SEC-HPLC and ETAAS: Study of breast milk and infant formulae whey used in lactation of full-term newborn infants, 571
- Field sample preconcentration of copper in sea water using chelating minicolumns subsequently incorporated on a flow-injection-flame atomic absorption spectrometry system, 933
- Simultaneous determination of Cd(II), Cu(II) and Pb(II) in surface waters by solid phase extraction and flow injection analysis with spectrophotometric detection, 1149
- Determination of Ba, Cd, Cu, Pb and Zn in saliva by isotope dilution direct injection inductively coupled plasma mass spectrometry, 1363
- Redox voltammetry of sub-parts per billion levels of Cu<sup>2+</sup> at polyspartate-modified gold electrodes, 1573
- Development of SdFFF-ETAAS for characterising soil and sediment colloids, 1588
- Determination of the stoichiometry of Cu<sub>2</sub>In<sub>2</sub>Se<sub>2</sub> by total-reflection XRF, 1797
- The electroanalytical detection and determination of copper in heavily passivating media: ultrasonically enhanced solvent extraction by *N*-benzoyl-*N*-phenyl-hydroxylamine in ethyl acetate coupled with electrochemical detection by sono-square wave stripping voltammetry analysis, 2025
- Optimization of the simultaneous batch determinations of Bi(III), Hg(II) and Cu(II) at an epoxy-graphite electrode bulk modified with 2-mercaptobenzothiazole, 2172
- Selective extraction of blood plasma exchangeable copper for isotope studies of dietary copper absorption, 2225
- CORALS**
- Determination of carbonate in marine solid samples by FTIR-ATR spectroscopy, 144
- COSMETICS**
- Monoparameter sensors for the determination of the antioxidants butylated hydroxyanisole and *n*-propyl gallate in foods and cosmetics by flow injection spectrophotometry, 897
- Stopped-flow Fourier-transform infra-red spectrometric speciation of glycolic and lactic acids in cosmetic formulations, 1428
- Voltammetric investigation of hair dye constituents: application to the quantification of *p*-phenylenediamine, 1897
- CRYSTAL VIOLET**
- Determination of nucleic acids with Crystal Violet by a resonance light-scattering technique, 513
- CYCLIC VOLTAMMETRY**
- Electrochemical determination of dopamine using a poly(2-picolinic acid) modified glassy carbon electrode, 358
- Covalent modification of glassy carbon electrode with glutamic acid for simultaneous determination of uric acid and ascorbic acid, 367
- CYCLODEXTRIN**
- A direct sensitized fluorimetric determination of 5,10,15,20-tetra(*m*-hydroxyphenyl)chlorin [m-THPC (Foscan)®] in human plasma using a cyclodextrin inclusion complex, 923
- CYCLOHEXANOL**
- FTIR sensing of inhomogeneous systems using immobilized organometalcarbonyl probe groups, 647
- CYSTEINE**
- Electroanalytical exploitation of quinone-thiol interactions: application to the selective determination of cysteine, 353
- DATA ANALYSIS**
- Process NMR spectrometry, 260
- DATA HANDLING**
- Practical approach to archival and retrieval of analytical data in the laboratory, 1194
- DECHLORINATION**
- Investigation of mechanisms for the reductive dechlorination of chlorinated ethylenes using electroanalytical techniques, 1901

**DENSITY**

Simultaneous (or sequential) determination of the total polyphenol index (or  $I_{280}$ ) and density in wines by flow injection, 251

**DEOXYRIBONUCLEIC ACID**

Methylene blue as an electrochemical discriminator of single- and double-stranded oligonucleotides immobilised on gold substrates, 1756

**DERIVATIZATION**

Development and optimisation of an improved derivatisation procedure for the determination of avermectins and milbemycins in bovine liver, 576

Determination of aliphatic amines in water by liquid chromatography using solid-phase extraction cartridges for preconcentration and derivatization, 1683

Determination of biogenic amines in wine by multidimensional liquid chromatography with online derivatisation, 2124

**DETERGENT**

Simultaneous determination of phosphate and silicate in detergents and waters by first-derivative spectrophotometry, 1810

**DIALYSIS**

Evaluation of dialysis as a technique for the removal of lipids prior to the GC determination of *ortho*- and non-*ortho*-chlorobiphenyls, using  $^{14}\text{C}$ -labelled congeners, 829

**DIALYSIS CELLS**

Dialysis cells for controlled DNA:drug binding studies, 852

**DIAZEPAM**

Optimisation and validation of a capillary electrophoresis method for the simultaneous determination of diazepam and otilonium bromide, 1700

**DICHROMATE**

Electrochemical titrations of thiosulfate, sulfite, dichromate and permanganate using dual microband electrodes, 86

**DIFFERENTIAL-PULSE ANODIC STRIPPING VOLTAMMETRY**

Optimization of the simultaneous batch determinations of Bi(III), Hg(II) and Cu(II) at an epoxy-graphite electrode bulk modified with 2-mercaptobenzothiazole, 2172

**DIFFERENTIAL-PULSE POLAROGRAPHY**

Electrochemical studies and differential pulse polarographic analysis of lansoprazole in pharmaceuticals, 361

**DIFFERENTIAL PULSE VOLTAMMETRY**

Covalent modification of glassy carbon electrode with glutamic acid for simultaneous determination of uric acid and ascorbic acid, 367

Selective determination of dopamine in the presence of ascorbic acid at an over-oxidized poly(*N*-acetylaniline) electrode, 736

Speciation of aluminium(III) in natural waters using differential pulse voltammetry with a Pyrocatechol Violet-modified electrode, 1404

**DIISOCYANATES**

Exposure to 2,4- and 2,6-toluene diisocyanate (TDI) during production of flexible foam: determination of airborne TDI and urinary 2,4- and 2,6-toluenediamine (TDA), 1025

**DIOXANE**

Headspace gas chromatographic determination of 2-alkyl-5,5-dimethyl-1,3-dioxane derivatives in wastewaters of a polyester resin plant, 469

**DIPHENYLAMINE**

Determination of diphenylamine stabilizer and its nitrated derivatives in smokeless gunpowder using a tandem MS method, 480

**DNA**

Bar coding objects with DNA, 545

Nonlinear electrophoretic focusing of DNA macromolecules, 559

Dialysis cells for controlled DNA:drug binding studies, 852

Visualization of DNA microarrays by scanning electrochemical microscopy (SECM), 1210

Characterization of DNA-protein complexes by capillary electrophoresis-single molecule fluorescence correlation spectroscopy, 1279

Amplified detection of DNA and analysis of single-base mismatches by the catalyzed deposition of gold on Au-nanoparticles, 1502

Real-time monitoring of formaldehyde-induced DNA-lysozyme cross-linking with piezoelectric quartz crystal impedance analysis, 1568

Magnetic bead-based label-free electrochemical detection of DNA hybridization, 2020

**DODECANE**

FTIR sensing of inhomogeneous systems using immobilized organometalcarbonyl probe groups, 647

**DOPAMINE**

Electrochemical determination of dopamine using a poly(2-picolinic acid) modified glassy carbon electrode, 358

Selective determination of dopamine in the presence of ascorbic acid at an over-oxidized poly(*N*-acetylaniline) electrode, 736

Separation of anodic peaks of ascorbic acid and dopamine at an  $\alpha$ -alanine covalently modified glassy carbon electrode, 1760

**DROPLET SAMPLING**

A new fluorimetric method for the determination of formaldehyde in air based on the liquid droplet sampling technique, 104

**DRUG**

Flow injection potentiometric determination of pipazethate hydrochloride, 79

Multi-residue analysis of avermectins and moxidectin by ion-trap LC-MS<sup>n</sup>, 155

Direct determination of naftopidil by non-protected fluid room temperature phosphorescence, 234

The potential of  $^{19}\text{F}$  NMR spectroscopy for rapid screening of cell cultures for models of mammalian drug metabolism, 2103

*N*-Isobutyloxycarbonylation for improved detection of 3'-hydroxystanozolol and its 17-epimer in doping control, 306

Electrochemical studies and differential pulse polarographic analysis of lansoprazole in pharmaceuticals, 361

A quartz crystal resonant sensor (QCRS) study of HSA-drug interactions, 426

Chromatographic analysis of phenethylamine-antihistamine combinations using  $\text{C}_{18}$ ,  $\text{C}_{18}$  or cyano columns and micellar sodium dodecyl sulfate-pentanol mixtures, 457

The preparation, solubilisation and binding characteristics of a  $\beta$ 2-adrenoceptor isolated from transfected Chinese hamster cells, 491

Development and optimisation of an improved derivatisation procedure for the determination of avermectins and milbemycins in bovine liver, 576

Sensitive determination of methylenedioxyated amphetamines by liquid chromatography, 581

Determination of linezolid in human plasma by LC-MS-MS, 609

A microbiological six-plate method for the identification of certain antibiotic groups in incurred kidney and muscle samples, 641

Investigation of heroin profiling using trace organic impurities, 679

An unexpected selectivity of a propranolol-derived molecular imprint for tamoxifen, 757

Towards the development of molecularly imprinted artificial receptors for the screening of estrogenic chemicals, 760

Dialysis cells for controlled DNA:drug binding studies, 852

Determination of naproxen in pharmaceutical preparations by room-temperature phosphorescence. A comparative study of several organized media, 917

A direct sensitized fluorimetric determination of

5,10,15,20-tetra(*m*-hydroxyphenyl)chlorin [*m*-THPC (Foscan)@] in human plasma using a cyclodextrin inclusion complex, 923

Construction and application of phenytoin anion-selective electrode based on bulk acoustic wave (BAW) sensing technique, 1090

Determination of the content and identity of lidocaine solutions with UV-visible spectroscopy and multivariate calibration, 1142

Simultaneous determination of morphine and its glucuronides in rat hair and rat plasma by reversed-phase liquid chromatography with electrospray ionization mass spectrometry, 1339

Separation and determination of protocatechuic aldehyde and protocatechuic acid in *Salvia miltiorrhiza* by capillary electrophoresis with amperometric detection, 1519

Determination of the active ingredients in *Gastrodia rhizoma* by capillary electrophoresis with electrochemical detection, 1524

High-throughput screening using the surface plasmon resonance effect of colloidal gold nanoparticles, 1645

Optimisation and validation of a capillary electrophoresis method for the simultaneous determination of diazepam and otilonium bromide, 1700

Quartz crystal resonant sensor (QCRS) model for label-free, small molecules—receptor studies, 1711

Sensor chip preparation and assay construction for immunobiosensor determination of beta-agonists and hormones, 1721

Application of chemometric techniques to the characterisation of impregnated materials obtained following supercritical fluid technology, 1792

Recognition of ephedrine enantiomers by molecularly imprinted polymers designed using a computational approach, 1826

Two OPEEs (organic phase enzyme electrodes) used to check the percentage water content in hydrophobic foods and drugs, 1923

High performance liquid chromatographic determination of mazindol in human plasma, 1963

Direct simultaneous analysis of plasma samples for a drug discovery compound and its hydroxyl metabolite using mixed-function column liquid chromatography-tandem mass spectrometry, 2139

Development and validation of a liquid chromatography-electrospray tandem mass spectrometry method for mebendazole and its metabolites

hydroxymebedazole and aminomebedazole in sheep liver, 2144

Identification of counterfeit drugs using near-infrared spectroscopy, 2218

**DUST**

Phenolics in selected European hardwood species by liquid

chromatography-electrospray ionisation mass spectrometry, 1535

**DYE**

Study of the spectrophotometric analysis of protein solution with

*p*-iodochlorophosphonazo as adsorbate by the microphase

adsorption-spectral correction technique, 528

Voltammetric investigation of hair dye constituents: application to the quantification of *p*-phenylenediamine, 1897

**E. COLI**

Sequences of *E. coli* O157:H7 detected by a PCR-acoustic wave sensor combination, 2153

**EDIBLE OIL**

A rapid method for peroxide value determination in edible oils based on flow analysis with Fourier transform infrared spectroscopic detection, 242

**EGGS**

Efficient and sensitive screening and confirmation of residues of selected

- polyether ionophore antibiotics in liver and eggs by liquid chromatography-electrospray tandem mass spectrometry, 1990
- ELECTRIC FIELD-INDUCED MOBILITY**  
Electric field-induced mobilisation of multiphase solution systems based on the nitration of benzene in a micro reactor, 14
- ELECTROCHEMICAL DETECTION**  
Study of the separation and determination of monosaccharides in soluble coffee by capillary zone electrophoresis with electrochemical detection, 298  
Small volume bead assay for ovalbumin with electrochemical detection, 337  
Electrochemical determination of dopamine using a poly(2-picoline acid) modified glassy carbon electrode, 358  
An integrated electrochemical capillary liquid chromatography-dual microelectrode system for bromine based reaction detection, 1252  
Determination of the active ingredients in *Gastrodia rhizoma* by capillary electrophoresis with electrochemical detection, 1524  
A new electrochemical enzyme-linked immunosorbent assay for the screening of macrolide antibiotic residues in bovine meat, 1942  
The electroanalytical detection and determination of copper in heavily passivating media: ultrasonically enhanced solvent extraction by *N*-benzoyl-*N*-phenyl-hydroxylamine in ethyl acetate coupled with electrochemical detection by sonosquare wave stripping voltammetry analysis, 2025
- ELECTROCHEMICAL PRE-SEPARATION**  
Determination of Co(II) by chemiluminescence after *in situ* electrochemical pre-separation on a flow-through mercury film electrode, 109
- ELECTROCHEMILUMINESCENCE**  
Electrochemiluminescence of tris(2,2'-bipyridine)ruthenium(II) immobilized in poly(*p*-styrenesulfonate)-silica-Triton X-100 composite thin-films, 1095  
Simulation of the microdisc problem in spherical co-ordinates. Application to electrochemiluminescence homogeneous analysis, 1888
- ELECTROCHEMISTRY**  
Electrochemical detection of sequence-specific DNA using a DNA probe labeled with aminofluorene and chitosan modified electrode immobilized with ssDNA, 62  
Electrochemical titrations of thiosulfate, sulfite, dichromate and permanganate using dual microband electrodes, 86  
Carbon paste-based electrochemical detectors for microchip capillary electrophoresis/electrochemistry, 277  
Liquid chromatography with post-column electrochemical treatment and mass spectrometric detection of non-polar compounds, 288  
Electroanalytical exploitation of quinone-thiol interactions: application to the selective determination of cysteine, 353  
Electrochemical studies and differential pulse polarographic analysis of lansoprazole in pharmaceuticals, 361  
Simultaneous determination of twelve tea catechins by high-performance liquid chromatography with electrochemical detection, 816  
Preparation of microporous aluminium anodic oxide film modified Pt nano array electrode and application in direct measurement of nitric oxide release from myocardial cells, 871  
Electrocatalytic cyclization of dithiothreitol on a chemically modified electrode by analogy with protein action, 1409  
Redox voltammetry of sub-parts per billion levels of Cu<sup>2+</sup> at polyspartate-modified gold electrodes, 1573  
Methylene blue as an electrochemical discriminator of single- and double-stranded oligonucleotides immobilised on gold substrates, 1756  
Electrochemistry of iron oxide pigments (earths) from pictorial microsamples attached to graphite-polyester composite electrodes, 1764  
Electrochemically modulated liquid chromatography: an electrochemical strategy for manipulating chromatographic retention, 1841  
Zeolite-membrane modulation of simple and facilitated ion transfer, 1857  
An assay for the enzyme *N*-acetyl- $\beta$ -D-glucosaminidase (NAGase) based on electrochemical detection using screen-printed carbon electrodes (SPCEs), 1866  
Electrochemical recognition of charged species using quaternary ammonium binaphthyl salts, 1892  
Voltammetric investigation of hair dye constituents: application to the quantification of *p*-phenylenediamine, 1897  
Investigation of mechanisms for the reductive dechlorination of chlorinated ethylenes using electroanalytical techniques, 1901  
Redox modification of proteins using sequential-parallel electrochemistry in microtiter plates, 1912  
Effect of interfering substances on current response of recombinant peroxidase and glucose oxidase-recombinant peroxidase modified graphite electrodes, 1929
- ELECTROCHROMATOGRAPHY**  
Surface initiated molecularly imprinted polymer films: a new approach in chiral capillary electrochromatography, 1495
- ELECTRODE**  
Electrochemical detection of sequence-specific DNA using a DNA probe labeled with aminofluorene and chitosan modified electrode immobilized with ssDNA, 62  
Electrochemical titrations of thiosulfate, sulfite, dichromate and permanganate using dual microband electrodes, 86  
Determination of Co(II) by chemiluminescence after *in situ* electrochemical pre-separation on a flow-through mercury film electrode, 109  
Electrochemical determination of dopamine using a poly(2-picoline acid) modified glassy carbon electrode, 358  
Covalent modification of glassy carbon electrode with glutamic acid for simultaneous determination of uric acid and ascorbic acid, 367  
Multimembrane carbon fiber microelectrodes for amperometric determination of serotonin in human urine, 495  
Integration of microfabricated needle-type glucose sensor devices with a novel thin-film Ag/AgCl electrode and plasma-polymerized thin film: mass production techniques, 658  
Preparation of microporous aluminium anodic oxide film modified Pt nano array electrode and application in direct measurement of nitric oxide release from myocardial cells, 871  
Determination of horseradish peroxidase and a peroxidase-like iron porphyrin at a Nafion-modified electrode, 887  
Enzyme modified microband electrodes: cross-talk effects and their elimination, 1068  
Electrochemiluminescence of tris(2,2'-bipyridine)ruthenium(II) immobilized in poly(*p*-styrenesulfonate)-silica-Triton X-100 composite thin-films, 1095  
Effect of pre-treatment on the surface and electrochemical properties of screen-printed carbon paste electrodes, 1399  
Redox voltammetry of sub-parts per billion levels of Cu<sup>2+</sup> at polyspartate-modified gold electrodes, 1573  
Separation of anodic peaks of ascorbic acid and dopamine at an  $\alpha$ -alanine covalently modified glassy carbon electrode, 1760  
Electrochemistry of iron oxide pigments (earths) from pictorial microsamples attached to graphite-polyester composite electrodes, 1764  
Zeolite-membrane modulation of simple and facilitated ion transfer, 1857  
Electrochemical and spectroscopic characterization of quinone functionalized exfoliated graphite, 1872  
Nanocomposite electrodes made of carbon nanofibers and black wax. Anodic stripping voltammetry of zinc and lead, 1878  
Potentiometric titrations using dual microband electrodes, 1882  
Two OPEs (organic phase enzyme electrodes) used to check the percentage water content in hydrophobic foods and drugs, 1923  
Magnetic bead-based label-free electrochemical detection of DNA hybridization, 2020  
Electrode modification and the response of the acoustic shear wave device operating in liquids, 2159
- ELECTROGENERATED CHEMILUMINESCENCE**  
Tris(2,2'-bipyridine)ruthenium (II) electrogenerated chemiluminescence of alkaloid type drugs with solid phase extraction sample preparation, 37
- ELECTROLYTE CATHODE DISCHARGE**  
The influence of chlorine on the intensity of metal atomic lines emitted by an electrolyte cathode atmospheric glow discharge, 712
- ELECTROOSMOTIC FLOW**  
The generation of concentration gradients using electroosmotic flow in micro reactors allowing stereoselective chemical synthesis, 11  
On-line monitoring of electroosmotic flow for capillary electrophoretic separations, 1240
- ELECTROPHORESIS**  
A two-electrode configuration for simplified amperometric detection in a microfabricated electrophoretic separation device, 147  
Nonlinear electrophoretic focusing of DNA macromolecules, 559
- ELECTROSPRAY**  
Automated on-line in-tube solid-phase microextraction followed by liquid chromatography/electrospray ionization-mass spectrometry for the determination of chlorinated phenoxy acid herbicides in environmental waters, 602  
Determination of phytochelators by capillary zone electrophoresis with electrospray tandem mass spectrometry detection (CZE-ES MS/MS), 624  
Investigation of arsenic speciation in oyster test reference material by multidimensional HPLC-ICP-MS and electrospray tandem mass spectrometry (ES-MS-MS), 1055  
Simultaneous determination of morphine and its glucuronides in rat hair and rat plasma by reversed-phase liquid chromatography with electrospray ionization mass spectrometry, 1339  
A study of the effect of pH, solvent system, cone potential and the addition of crown ethers on the formation of the monensin protonated parent ion in electrospray mass spectrometry, 1630
- ELECTROSPRAY IONIZATION**  
Electrospray ionisation-mass spectrometry of hydroxamate siderophores, 1359  
Approach to the determination of insulin-like-growth-factor-I (IGF-I) concentration in plasma by high-performance liquid chromatography-ion trap mass spectrometry: use of a deconvolution algorithm for the quantification of multiprotonated molecules in electrospray ionization, 1996
- ELECTROSPRAY MASS SPECTROMETRY**  
Phenolics in selected European hardwood species by liquid chromatography-electrospray ionisation mass spectrometry, 1535  
Detection of aflatoxins (G<sub>1-2</sub>, B<sub>1-2</sub>), sterigmatocystin, citrinine and ochratoxin A in samples contaminated by microbes, 1545  
Efficient and sensitive screening and confirmation of residues of selected

- polyether ionophore antibiotics in liver and eggs by liquid chromatography-electrospray tandem mass spectrometry, 1990
- Development and validation of a liquid chromatography-electrospray tandem mass spectrometry method for mebendazole and its metabolites hydroxymebendazole and aminomebendazole in sheep liver, 2144
- ELECTROTHERMAL ATOMIC ABSORPTION SPECTROMETRY**
- Determination of tellurium in indium antimonide semiconductor material by electrothermal atomic absorption spectrometry, 1449
- Separation and preconcentration of chromium species by selective absorption on *Lemna minor* and determination by slurry atomisation electrothermal atomic absorption spectrometry, 1453
- Development of SdFFF-ETAAS for characterising soil and sediment colloids, 1588
- Preconcentration of trace amounts of cadmium in aqueous samples on minicolumns packed with Chromosorb series gas chromatographic stationary phases and its determination by electrothermal atomic absorption spectrometry, 1678
- ELEMENTAL ANALYSIS**
- Determination of the abundance of  $\delta^{15}\text{N}$  in nitrate ion in contaminated groundwater samples using an elemental analyzer coupled to a mass spectrometer, 1051
- ENANTIOMERS**
- Enantioseparation of chiral amino acids as the *N*-(*O,S*)-ethoxycarbonylated diastereomeric esters by achiral dual-capillary column gas chromatography, 2128
- ENVIRONMENTAL**
- Development of a procedure for measuring nitrogen by cold neutron prompt gamma-ray activation analysis, 217
- Investigations of the origins of estrogenic A-ring aromatic steroids in UK sewage treatment works effluents, 285
- Development of an analytical technique and stability evaluation of 143  $\text{C}_3\text{--C}_{12}$  volatile organic compounds in Summa® canisters by gas chromatography-mass spectrometry, 310
- Analysis of fuel oxygenates in the environment, 405
- Determination of manganese in water samples by flame atomic absorption spectrometry after cloud point extraction, 534
- Differential-pulse voltammetric determination of trace formaldehyde using magnetic microspheres and magnetic electrode, 676
- High-resolution determination of  $\text{H}^+$  by ion chromatography. Application to the simultaneous determination of  $\text{H}^+$ ,  $\text{Na}^+$ ,  $\text{NH}_4^+$  and  $\text{K}^+$  in acid rain, 821
- Determination of linear alkylbenzene sulfonates and their polar carboxylic degradation products in sewage treatment plants by automated solid-phase extraction followed by capillary electrophoresis-mass spectrometry, 825
- Microwave-assisted extraction of monomethyl arsonic acid from soil and sediment standard reference materials, 1511
- Phenolics in selected European hardwood species by liquid chromatography-electrospray ionisation mass spectrometry, 1535
- Redox voltammetry of sub-parts per billion levels of  $\text{Cu}^{2+}$  at polyaspartate-modified gold electrodes, 1573
- Micro sequential injection: environmental monitoring of nitrogen and phosphate in water using a "Lab-on-Valve" system furnished with a microcolumn, 1947
- Rapid determination of sulfonated naphthalenes and their formaldehyde condensates in aqueous environmental samples using synchronous excitation fluorimetry, 2072
- Determination of dialkyldimethylammonium surfactants in sewage based on the formation of premicellar aggregates, 2230
- ENZYMATIC ANALYSIS**
- Enzymatic reactions for the determination of sugars in food samples using the differential pH technique, 2149
- ENZYME**
- Optical fibre biosensors based on immobilised enzymes, 1469
- Dot-blot amperometric genosensor for detecting a novel determinant of  $\beta$ -lactamase resistance in *Staphylococcus aureus*, 1551
- An assay for the enzyme *N*-acetyl- $\beta$ -D-glucosaminidase (NAGase) based on electrochemical detection using screen-printed carbon electrodes (SPCEs), 1866
- Two OPEEs (organic phase enzyme electrodes) used to check the percentage water content in hydrophobic foods and drugs, 1923
- ENZYME-FUNCTIONALIZED FIELD EFFECT**
- An integrated relay/nitrate reductase field-effect transistor for the sensing of nitrate ( $\text{NO}_3^-$ ), 652
- ENZYME IMMOBILISATION**
- An optical glucose biosensor with eggshell membrane as an enzyme immobilisation platform, 1558
- ENZYME IMMUNOASSAY**
- High sensitivity microgravimetric biosensor for qualitative and quantitative diagnostic detection of polychlorinated dibenzo-*p*-dioxins, 71
- Small volume bead assay for ovalbumin with electrochemical detection, 337
- ENZYME INHIBITION**
- Flow injection analysis of mercury(II) based on enzyme inhibition and thermometric detection, 1612
- ENZYME-LINKED IMMUNOSORBENT ASSAY**
- Immunodetection of lactosylated proteins as a useful tool to determine heat treatment in milk samples, 66
- Enzyme-linked immunosorbent assays based on peroxidase labels and enzyme-amplified lanthanide luminescence detection, 175
- Quantification and validation of enzyme immunoassay for urinary aflatoxin  $\text{B}_1$ - $\text{N}^7$ -guanine adduct for biological monitoring of aflatoxins, 179
- Production of monoclonal antibodies against a major purgative component, sennoside B, their characterization and use in ELISA, 1372
- Dextran-modified surface for highly sensitive chemiluminescent ELISA, 1633
- A new electrochemical enzyme-linked immunosorbent assay for the screening of macrolide antibiotic residues in bovine meat, 1942
- EPOXIDE**
- Enantioselective separation of epoxides by capillary electrophoresis employing sulfated  $\beta$ -cyclodextrin as chiral selector, 438
- EQUILIBRIUM**
- Error-compensated kinetic determinations by detecting the reagent in successive reactions, 690
- ESTROGENS**
- Investigations of the origins of estrogenic A-ring aromatic steroids in UK sewage treatment works effluents, 285
- Towards the development of molecularly imprinted artificial receptors for the screening of estrogenic chemicals, 760
- ETHANOL**
- Determination of acetonitrile and ethanol in water by guided microwave spectroscopy with multivariate calibration, 417
- Two-parameter determination in vinegar by a flow injection-pervaporation system, 1177
- ETHINYLESTRADIOL**
- Sensor chip preparation and assay construction for immunobiosensor determination of beta-agonists and hormones, 1721
- ETHYLENE PROPYLENE DIENE MONOMER**
- Near-infrared transmittance spectroscopy for radiochemical ageing of EPDM, 2201
- EVANESCENT WAVE PROBE**
- Chip-based refractive index detection using a single point evanescent wave probe, 1505
- EXTRACTION**
- Recent extraction techniques for solid matrices—supercritical fluid extraction, pressurized fluid extraction and microwave-assisted extraction: their potential and pitfalls, 1182
- Metal fractionation in olive oil and urban sewage sludges using the three-stage BCR sequential extraction method and microwave single extractions, 1304
- Microwave-assisted extraction of monomethyl arsonic acid from soil and sediment standard reference materials, 1511
- Multiresidue analysis of pesticides in vegetables and fruits using two-layered column with graphitized carbon and water absorbent polymer, 1529
- Extraction chromatographic separations and analysis of actinides using sequential injection techniques with on-line inductively coupled plasma mass spectrometry (ICP MS) detection, 1594
- Headspace extraction of alcohols into a single drop, 1674
- FAST PROTEIN LIQUID CHROMATOGRAPHY**
- Potential for the speciation of Zn using fast protein liquid chromatography (FPLC) and convective interaction media (CIM) fast monolithic chromatography with FAAS and electrospray (ES)-MS-MS detection, 1346
- FAT**
- Determination of fat in leather by the use of supercritical fluid extraction combined with on-line piezoelectric detection, 938
- FATTY ACID**
- Quick regiospecific analysis of fatty acids in triacylglycerols with GC using 1,3-specific lipase in butanol, 1032
- FEEDSTUFF**
- Development and validation of a method for the determination of sub-additive levels of virginiamycin in compound animal feeds by liquid chromatography, 1332
- FERRICYANIDE**
- Detection of ferricyanide as a probe for the effect of hematocrit in whole blood biosensors, 861
- FIELD-FLOW FRACTIONATION**
- Development of SdFFF-ETAAS for characterising soil and sediment colloids, 1588
- FLAME ATOMIC ABSORPTION SPECTROMETRY**
- Separation and preconcentration of  $\text{Mn}^{\text{VII}}/\text{Mn}^{\text{II}}$  speciation on crosslinked chitosan and determination by flame atomic absorption spectrometry, 239
- An optimised single-reagent method for the speciation of chromium by flame atomic absorption spectrometry based on surfactant micelle-mediated methodology, 389
- FLOW ANALYSIS**
- Capillary-scale polarimetry for flowing streams, 673
- A robust multi-syringe system for process flow analysis. Part 3. Time based injection applied to the spectrophotometric determination of nickel(II) and iron speciation, 903

Velocity measurement of particulate flow in microfluidic channels using single point confocal fluorescence detection, 1953

## FLOW INJECTION

Flow injection potentiometric determination of pipazethate hydrochloride, 79

Continuous and stopped flow injection for catalytic determination of total iodine in urine, 121

A rapid method for peroxide value determination in edible oils based on flow analysis with Fourier transform infrared spectroscopic detection, 242

Flow injection manifold for the direct spectrophotometric determination of bismuth in pharmaceutical products using Methylthymol Blue as a chromogenic reagent, 247

Simultaneous (or sequential) determination of the total polyphenol index (or  $I_{280}$ ) and density in wines by flow injection, 251

Capillary electrophoresis system with flow injection sample introduction and chemiluminescence detection on a chip platform, 281

Micro sequential injection: fermentation monitoring of ammonia, glycerol, glucose, and free iron using the novel lab-on-valve system, 291

Oscillatory control of sample dispersion in a continuous flow system, 394

Chemiluminescence of Ce(IV) and surfactant Tween 20, 553

Speciation and preconcentration of vanadium(V) and vanadium(IV) in water samples by flow injection-inductively coupled plasma optical emission spectrometry and ultrasonic nebulization, 715

Flow injection analysis of L-lactate in milk and yoghurt by on-line microdialysis and amperometric detection at a disposable biosensor, 866

Monoparameter sensors for the determination of the antioxidants butylated hydroxyanisole and n-propyl gallate in foods and cosmetics by flow injection spectrophotometry, 897

Field sample preconcentration of copper in sea water using chelating minicolumns subsequently incorporated on a flow-injection-flame atomic absorption spectrometry system, 933

Electrochemiluminescence of tris(2,2'-bipyridine)ruthenium(II) immobilized in poly(*p*-styrenesulfonate)-silica-Triton X-100 composite thin-films, 1095

Simultaneous determination of Cd(II), Cu(II) and Pb(II) in surface waters by solid phase extraction and flow injection analysis with spectrophotometric detection, 1149

Spectrophotometric determination of trace aluminium content in parenteral solutions by combined cloud point preconcentration-flow injection analysis, 1172

Two-parameter determination in vinegar by a flow injection-pervaporation system, 1177

Determination of nitrite by inhibition of the chemiluminescence of acriflavine in a flow-injection assembly, 1423

Determination of ascorbyl 6-palmitate in food matrices by amperometric flow injection analysis, 1466

Spectrophotometric bioanalytical flow-injection system for control of hemodialysis treatment, 1564

Rapid flow injection spectrophotometric determination of monofluorophosphates in toothpastes after on-line hydrolysis by alkaline phosphatase immobilized on a cellulose nitrate membrane, 1608

Flow injection analysis of mercury(II) based on enzyme inhibition and thermometric detection, 1612

Micro sequential injection: environmental monitoring of nitrogen and phosphate in water using a "Lab-on-Valve" system furnished with a microcolumn, 1947

*o*-Dianisidine: a new reagent for selective spectrophotometric, flow injection determination of chlorine, 2087

## FLUORESCENCE

Picric acid sensitive optode based on a fluorescence carrier covalently bound to membrane, 349

Fluorescence quenching high-performance thin-layer chromatographic analysis utilizing a scientifically operated charge-coupled device detector, 446

Determination of nucleic acids based on shifting the association equilibrium between tetrasulfonated aluminium phthalocyanine and Acridine Orange, 518

A fluorescent probe for monitoring nitric oxide production using a novel detection concept, 564

Fe(II)-EDTA chelate-induced aromatic hydroxylation of terephthalate as a new method for the evaluation of hydroxyl radical-scavenging ability, 928

Enantioselective molecular sensing of aromatic amines using tetra-(5)-di-2-naphthylprolinol calix[4]arene, 1063

Investigation of microcontact transfer of proteins from a selectively plasma treated elastomer stamp by fluorescence microscopy and force microscopy, 1100

Highly sensitive spectrofluorimetric determination of trace amounts of lead with a new fluorescent reagent, 2-hydroxy-1-naphthaldehyde-8-aminoquinoline, 1164

Investigation of the anthracene-nitroxide hybrid molecule as a probe for hydroxyl radicals, 1800

Velocity measurement of particulate flow in microfluidic channels using single point confocal fluorescence detection, 1953

## FLUORESCENCE CORRELATION SPECTROSCOPY

Dynamic two-dimensional fluorescence correlation spectroscopy,

Generalized correlation and experimental factors, 1229

## FLUORESCENCE SPECTROMETRY

A new red-region substrate, tetra-substituted amino aluminium phthalocyanine, for the fluorimetric determination of  $H_2O_2$  catalyzed by mimetic peroxidases, 523

Characterization of DNA-protein complexes by capillary electrophoresis-single molecule fluorescence correlation spectroscopy, 1279

Embossed polymer leaky waveguide devices for spectroscopic analysis, 1293

## FLUORIMETRY

Fluorimetric determination of isatin in human urine and serum by liquid chromatography postcolumn photoirradiation, 33

A new fluorimetric method for the determination of formaldehyde in air based on the liquid droplet sampling technique, 104

Sensitive detection of tetracyclines using europium-sensitized fluorescence with EDTA as co-ligand and cetyltrimethylammonium chloride as surfactant, 694

Improved fluorimetric determination of dissolved aluminium by micelle-enhanced lumogallion complex in natural waters, 698

A direct sensitized fluorimetric determination of 5,10,15,20-tetra(*m*-hydroxyphenyl)chlorin [*m*-THPC (Foscan)] in human plasma using a cyclodextrin inclusion complex, 923

Determination of PAH in food samples by HPLC with fluorimetric detection following sonication extraction without sample clean-up, 1326

Fluorimetric determination of total ascorbic acid by a stopped-flow mixing technique, 1436

Rapid determination of sulfonated naphthalenes and their formaldehyde condensates in aqueous environmental samples using synchronous excitation fluorimetry, 2072

A novel fluorescence reagent, 10-hydroxybenzo[*h*]quinoline-7-sulfonate, for selective determination of beryllium(II) ion at  $pg\ cm^{-3}$  levels, 2082

## FOOD

Characterization of Galician (N.W. Spain) quality brand potatoes: a comparison study of several pattern recognition techniques, 97

Small volume head assay for ovalbumin with electrochemical detection, 337

The preparation, solubilisation and binding characteristics of a  $\beta_2$ -adrenoceptor isolated from transfected Chinese hamster cells, 491

Monoparameter sensors for the determination of the antioxidants butylated hydroxyanisole and n-propyl gallate in foods and cosmetics by flow injection spectrophotometry, 897

Colorimetric determination of inorganic iodine in fortified culinary products, 985

Arsenic extraction and speciation in carrots using accelerated solvent extraction, liquid chromatography and plasma mass spectrometry, 1011

Determination of PAH in food samples by HPLC with fluorimetric detection following sonication extraction without sample clean-up, 1326

Determination of ascorbyl 6-palmitate in food matrices by amperometric flow injection analysis, 1466

Peroxidase enzyme sensor for on-line monitoring of disinfection processes in the food industry, 1733

Optimised uncertainty at minimum overall cost to achieve fitness-for-purpose in food analysis, 1777

Two OPEEs (organic phase enzyme electrodes) used to check the percentage water content in hydrophobic foods and drugs, 1923

Enzymatic reactions for the determination of sugars in food samples using the differential pH technique, 2149

Authentication of Galician (N.W. Spain) quality brand potatoes using metal analysis. Classical pattern recognition techniques *versus* a new vector quantization-based classification procedure, 2186

## FORENSIC ANALYSIS

Application of SERS spectroscopy to the identification of (3,4-methylenedioxy)amphetamine in forensic samples utilizing matrix stabilized silver halides, 2066

## FORMALDEHYDE

A new fluorimetric method for the determination of formaldehyde in air based on the liquid droplet sampling technique, 104

Differential-pulse voltammetric determination of trace formaldehyde using magnetic microspheres and magnetic electrode, 676

Determination of airborne formaldehyde by active sampling on 3-methyl-2-benzothiazolinone hydrazone hydrochloride-coated glass fibre filters, 720

## FORMIC ACID

Multivariate evaluation of factors influencing the performance of a formic acid biosensor for use in air monitoring, 2008

## FOURIER TRANSFORM

Characterisation of Shah convolution Fourier transform detection, 1640

## FOURIER TRANSFORM INFRARED SPECTROSCOPY

Determination of carbonate in marine solid samples by FTIR-ATR spectroscopy, 144

A rapid method for peroxide value determination in edible oils based on flow analysis with Fourier transform infrared spectroscopic detection, 242

- FTIR sensing of inhomogeneous systems using immobilized organometalcarbonyl probe groups, 647
- Stopped-flow Fourier-transform infra-red spectrometric speciation of glycolic and lactic acids in cosmetic formulations, 1428
- Vapour phase Fourier transform infrared spectrometric determination of thiourea, 1432
- Electrochemical and spectroscopic characterization of quinone functionalized exfoliated graphite, 1872
- FOURIER-TRANSFORM RAMAN SPECTROSCOPY**
- Mediaeval cantors in the Valladolide Biblioteca : FT-Raman spectroscopic study, 383
- FRUIT**
- Expression of results with uncertainty for the determination of pesticides in melon - experience in a proficiency test, 743
- Multiresidue analysis of pesticides in vegetables and fruits using two-layered column with graphitized carbon and water absorbent polymer, 1529
- FUEL**
- Analysis of fuel oxygenates in the environment, 405
- FUNGICIDE**
- Capillary zone electrophoresis for the determination of thiabendazole, prochloraz and procymidone in grapes, 2134
- GAMMA RAYS**
- Development of a procedure for measuring nitrogen by cold neutron prompt gamma-ray activation analysis, 217
- Influence of gamma irradiation on a natural source of peroxidase and its effect in the reagentless amperometric biosensor for hydrogen peroxide, 739
- GAS ANALYSIS**
- Selective ultra-trace detection of NO and NO<sub>2</sub> in complex gas mixtures using broad-bandwidth REMPI mass spectrometry, 1221
- GAS CHROMATOGRAPHY**
- Determination of low concentrations of benzene in urine using multi-dimensional gas chromatography, 41
- Gas chromatographic determination of pesticides in vegetable samples by sequential positive and negative chemical ionization and tandem mass spectrometric fragmentation using an ion trap analyser, 46
- Preliminary studies into the direct interfacing of a microreactor to a gas chromatographic instrument, 133
- Investigations of the origins of estrogenic A-ring aromatic steroids in UK sewage treatment works effluents, 285
- N-Isobutyloxycarbonylation for improved detection of 3'-hydroxystanazolol and its 17-epimer in doping control, 306
- Development of an analytical technique and stability evaluation of 143 C<sub>3</sub>-C<sub>12</sub> volatile organic compounds in Summa® canisters by gas chromatography-mass spectrometry, 310
- Headspace gas chromatographic determination of 2-alkyl-5,5-dimethyl-1,3-dioxane derivatives in wastewaters of a polyester resin plant, 469
- Determination of aliphatic alcohols, squalene,  $\alpha$ -tocopherol and sterols in olive oils: direct method involving gas chromatography of the unsaponifiable fraction following silylation, 472
- Exposure to 4,4'-methylenebis(phenyl diisocyanate (MDI) during moulding of rigid polyurethane foam: determination of airborne MDI and urinary 4,4'-methylenedianiline (MDA), 476
- Analysis of badger urine volatiles using gas chromatography-mass spectrometry and pattern recognition techniques, 615
- Investigation of heroin profiling using trace organic impurities, 679
- Evaluation of dialysis as a technique for the removal of lipids prior to the GC determination of *ortho*- and non-*ortho*-chlorobiphenyls, using <sup>14</sup>C-labelled congeners, 829
- Trace level determination of phenols as pentafluorobenzyl derivatives by gas chromatography-negative-ion chemical ionization mass spectrometry, 835
- The determination of six taste and odour compounds in water using Ambersorb 572 and high resolution mass spectrometry, 840
- Report by the Analytical Methods Committee. Evaluation of analytical instrumentation. Part XV. Instrumentation for gas chromatography-ion-trap mass spectrometry, 953
- Exposure to 2,4- and 2,6-toluene diisocyanate (TDI) during production of flexible foam: determination of airborne TDI and urinary 2,4- and 2,6-toluenediamine (TDA), 1025
- Quick regiospecific analysis of fatty acids in triacylglycerols with GC using 1,3-specific lipase in butanol, 1032
- Negative ion chemical ionization GC/MS-MS analysis of dialkylphosphate metabolites of organophosphate pesticides in urine of non-occupationally exposed subjects, 1037
- Monitoring of 6-chloronicotinic acid in human urine by gas chromatography-tandem mass spectrometry as indicator of exposure to the pesticide imidacloprid, 1355
- Multiresidue analysis of pesticides in vegetables and fruits using two-layered column with graphitized carbon and water absorbent polymer, 1529
- Determination of trace amounts of off-flavor compounds in drinking water by stir bar sorptive extraction and thermal desorption GC-MS, 1652
- Determination of organochlorine pesticides in river water by gas chromatography-negative-ion chemical-ionization mass spectrometry using large volume injection, 1658
- Simultaneous determination of ammonia, aliphatic amines, aromatic amines and phenols at  $\mu\text{g l}^{-1}$  levels in environmental waters by solid-phase extraction of their benzoyl derivatives and gas chromatography-mass spectrometry, 1663
- A new method for analysis of coke on catalysts, 1669
- Preconcentration of trace amounts of cadmium in aqueous samples on minicolumns packed with Chromosorb series gas chromatographic stationary phases and its determination by electrothermal atomic absorption spectrometry, 1678
- Development of a glass ampoule system for evaluation of long-term sorption/desorption behavior of vapor phase volatile organic compounds in geosorbents, 1816
- Trace level analysis of polycyclic aromatic hydrocarbons in surface waters by solid phase extraction (SPE) and gas chromatography-ion trap mass spectrometry (GC-ITMS), 1974
- GENOMICS SOFTWARE**
- Searching the *Porphyromonas gingivalis* genome with peptide fragmentation mass spectra, 52
- GEOLOGICAL**
- Simplified method for the determination of Ru, Pd, Re, Os, Ir and Pt in chromitites and other geological materials by isotope dilution ICP-MS and acid digestion, 322
- GLOW DISCHARGE**
- The influence of chlorine on the intensity of metal atomic lines emitted by an electrolyte cathode atmospheric glow discharge, 712
- GLUCOSE**
- Micro sequential injection: fermentation monitoring of ammonia, glycerol, glucose, and free iron using the novel lab-on-valve system, 291
- On-line continuous monitoring of glucose or lactate by ultraslow microdialysis combined with a flow-through nanoliter biosensor based on poly(*m*-phenylenediamine) ultra-thin polymer membrane as enzyme electrode, 1073
- Glucose biochip: dual analyte response in connection to two pre-column enzymatic reactions, 1203
- A glucose biosensor based on electrodeposited biocomposites of gold nanoparticles and glucose oxidase enzyme, 1919
- GLUCOSE OXIDASE**
- A glucose biosensor based on electrodeposited biocomposites of gold nanoparticles and glucose oxidase enzyme, 1919
- GLYCEROL**
- Micro sequential injection: fermentation monitoring of ammonia, glycerol, glucose, and free iron using the novel lab-on-valve system, 291
- GLYCOLIC ACIDS**
- Stopped-flow Fourier-transform infra-red spectrometric speciation of glycolic and lactic acids in cosmetic formulations, 1428
- GLYCOSAMINOGLYCANS**
- Determination of free and total sulfate and phosphate in glycosaminoglycans by column-switching high-performance size-exclusion and ion chromatography and single-column ion chromatography, 169
- GOLD**
- A glucose biosensor based on electrodeposited biocomposites of gold nanoparticles and glucose oxidase enzyme, 1919
- GOOD LABORATORY PRACTICE**
- Practical approach to archival and retrieval of analytical data in the laboratory, 1194
- GRAPES**
- Capillary zone electrophoresis for the determination of thiabendazole, prochloraz and procymidone in grapes, 2134
- GRAPHITE**
- Electrochemical and spectroscopic characterization of quinone functionalized exfoliated graphite, 1872
- GRAPHITE ELECTRODE**
- Effect of interfering substances on current response of recombinant peroxidase and glucose oxidase-recombinant peroxidase modified graphite electrodes, 1929
- GROUNDWATER**
- Determination of the abundance of  $\delta^{15}\text{N}$  in nitrate ion in contaminated groundwater samples using an elemental analyzer coupled to a mass spectrometer, 1051
- GUIDED MICROWAVE SPECTROSCOPY**
- Determination of acetonitrile and ethanol in water by guided microwave spectroscopy with multivariate calibration, 417
- GUNPOWDER**
- Determination of diphenylamine stabilizer and its nitrated derivatives in smokeless gunpowder using a tandem MS method, 480
- HAIR**
- Optimization of the simultaneous batch determinations of Bi(III), Hg(II) and Cu(II) at an epoxy-graphite electrode bulk modified with 2-mercaptobenzothiazole, 2172
- HEMATOCRIT**
- Detection of ferricyanide as a probe for the effect of hematocrit in whole blood biosensors, 861
- HERBICIDE**
- Automated on-line in-tube solid-phase microextraction followed by liquid chromatography/electrospray ionization-mass spectrometry for the

- determination of chlorinated phenoxy acid herbicides in environmental waters, 602
- Thin layer molecularly imprinted microfiltration membranes by photofunctionalization using a coated  $\alpha$ -cleavage photoinitiator, 803
- HEXAMETHYLENETRIPEROXIDEDIAMINE**
- Development of an LC/MS method for the trace analysis of hexamethylenetriperoxidisediamine (HMTD), 1689
- HIGH-PERFORMANCE LIQUID CHROMATOGRAPHY**
- Fluorimetric determination of isatin in human urine and serum by liquid chromatography postcolumn photoirradiation, 33
- Determination of morpholine in air by derivatisation with 1-naphthylisothiocyanate and HPLC analysis, 152
- Liquid chromatography with post-column electrochemical treatment and mass spectrometric detection of non-polar compounds, 288
- Chromatographic analysis of phenethylamine-antihistamine combinations using  $C_{18}$ ,  $C_{18}$  or cyano columns and micellar sodium dodecyl sulfate-pentanol mixtures, 457
- Exposure to 4,4'-methylenediphenyl diisocyanate (MDI) during moulding of rigid polyurethane foam: determination of airborne MDI and urinary 4,4'-methylenedianiline (MDA), 476
- Copper fractionation by SEC-HPLC and ETAAS: Study of breast milk and infant formulae when used in lactation of full-term newborn infants, 571
- Development and optimisation of an improved derivatisation procedure for the determination of avermectins and milbemycins in bovine liver, 576
- Automated measurement system for  $H_2O_2$  in the atmosphere by diffusion scrubber sampling and HPLC analysis of  $Ti(IV)$ -PAR- $H_2O_2$  complex, 587
- A method for the measurement of catechol-*O*-methyltransferase activity using norepinephrine, an endogenous substrate, 637
- Synthesis of 5-fluorouracil-imprinted polymers with multiple hydrogen bonding interactions, 772
- Simultaneous determination of twelve tea catechins by high-performance liquid chromatography with electrochemical detection, 816
- Regiospecific characterisation of the triacylglycerols in animal fats using high performance liquid chromatography-atmospheric pressure chemical ionisation mass spectrometry, 1018
- Exposure to 2,4- and 2,6-toluene diisocyanate (TDI) during production of flexible foam: determination of airborne TDI and urinary 2,4- and 2,6-toluenediamine (TDA), 1025
- Investigation of arsenic speciation in oyster test reference material by multidimensional HPLC-ICP-MS and electrospray tandem mass spectrometry (ES-MS-MS), 1055
- Determination of PAH in food samples by HPLC with fluorimetric detection following sonication extraction without sample clean-up, 1326
- Microwave-assisted extraction of monomethyl arsonic acid from soil and sediment standard reference materials, 1511
- Phenolics in selected European hardwood species by liquid chromatography-electrospray ionisation mass spectrometry, 1535
- Detection of aflatoxins ( $G_{1-2}$ ,  $B_{1-2}$ ), sterigmatocystin, citrinine and ochratoxin A in samples contaminated by microbes, 1545
- Microwave treatment of biological samples for methylmercury determination by high performance liquid chromatography-cold vapour atomic fluorescence spectrometry, 1583
- High temperature reversed-phase HPLC using deuterium oxide as a mobile phase for the separation of model pharmaceuticals with multiple on-line spectroscopic analysis (UV, IR,  $^1H$ -NMR and MS), 1625
- Electrochemically modulated liquid chromatography: an electrochemical strategy for manipulating chromatographic retention, 1841
- High performance liquid chromatographic determination of mazindol in human plasma, 1963
- Approach to the determination of insulin-like-growth-factor-I (IGF-I) concentration in plasma by high-performance liquid chromatography-ion trap mass spectrometry: use of a deconvolution algorithm for the quantification of multiprotonated molecules in electrospray ionization, 1996
- Evaluation of column temperature as a means to alter selectivity in the cation exchange separation of alkali metals, alkaline earth metals and amines, 2113
- Direct simultaneous analysis of plasma samples for a drug discovery compound and its hydroxyl metabolite using mixed-function column liquid chromatography-tandem mass spectrometry, 2139
- Application of transmission near-infrared spectroscopy to uniformity of content testing of intact steroid tablets, 2207
- HOLLOW FIBRE MEMBRANE SOLVENT MICROEXTRACTION**
- Preliminary studies of a fast screening method for cocaine and cocaine metabolites in urine using hollow fibre membrane solvent microextraction (HFMSME), 1298
- HORMONE**
- Sensor chip preparation and assay construction for immunobiosensor determination of beta-agonists and hormones, 1721
- Application of transmission near-infrared spectroscopy to uniformity of content testing of intact steroid tablets, 2207
- HORSERADISH PEROXIDASE**
- Determination of horseradish peroxidase and a peroxidase-like iron porphyrin at a Nafion-modified electrode, 887
- HYDRIDE GENERATION**
- Expanding the scope of chemical vapor generation for noble and transition metals, 1833
- HYDROGEN**
- High-resolution determination of  $H^+$  by ion chromatography. Application to the simultaneous determination of  $H^+$ ,  $Na^+$ ,  $NH_4^+$  and  $K^+$  in acid rain, 821
- HYDROGEN BONDING**
- Synthesis of 5-fluorouracil-imprinted polymers with multiple hydrogen bonding interactions, 772
- HYDROGEN PEROXIDE**
- A new red-region substrate, tetra-substituted amino aluminium phthalocyanine, for the fluorimetric determination of  $H_2O_2$  catalyzed by mimetic peroxidases, 523
- Automated measurement system for  $H_2O_2$  in the atmosphere by diffusion scrubber sampling and HPLC analysis of  $Ti(IV)$ -PAR- $H_2O_2$  complex, 587
- Influence of gamma irradiation on a natural source of peroxidase and its effect in the reagentless amperometric biosensor for hydrogen peroxide, 739
- An unmediated hydrogen peroxide biosensor based on hemoglobin incorporated in a montmorillonite membrane, 1086
- HYDROPHOBIC INTERACTION CHROMATOGRAPHY**
- Separation and determination of denatured caseins by hydrophobic interaction chromatography Part II. Method validation and applications, 995
- HYDROXYL RADICAL**
- Investigation of the anthracene-nitroxide hybrid molecule as a probe for hydroxyl radicals, 1800
- IMIDACLOPRID**
- Monitoring of 6-chloronicotinic acid in human urine by gas chromatography-tandem mass spectrometry as indicator of exposure to the pesticide imidacloprid, 1355
- IMMUNOASSAY**
- Dioxin detection based on immunoassay using a polyclonal antibody against octa-chlorinated dibenzo-*p*-dioxin (OCDD), 1207
- Novel solution-phase immunoassays for molecular analysis of tumor markers, 1285
- Generic microcystin immunoassay based on monoclonal antibodies against Adda, 2002
- IMMUNOSENSOR**
- Enhanced surface plasmon resonance immunosensing using a streptavidin-biotinylated protein complex, 4
- Sensor chip preparation and assay construction for immunobiosensor determination of beta-agonists and hormones, 1721
- IMPRINTED POLYMERS**
- Synthesis of 5-fluorouracil-imprinted polymers with multiple hydrogen bonding interactions, 772
- Systematic study of steric and spatial contributions to molecular recognition by non-covalent imprinted polymers, 793
- Surface initiated molecularly imprinted polymer films: a new approach in chiral capillary electrochromatography, 1495
- INDIUM**
- Determination of the stoichiometry of  $Cu_3In_2Se_7$  by total-reflection XRF, 1797
- INDUCTIVELY COUPLED PLASMA**
- Application of central composite designs for optimisation of the chromatographic separation of monomethylarsonate and dimethylarsinate and of selenomethionine and selenite by ion-pair chromatography coupled with plasma mass spectrometric detection, 594
- Speciation and preconcentration of vanadium(V) and vanadium(IV) in water samples by flow injection-inductively coupled plasma optical emission spectrometry and ultrasonic nebulization, 715
- Investigation of arsenic speciation in oyster test reference material by multidimensional HPLC-ICP-MS and electrospray tandem mass spectrometry (ES-MS-MS), 1055
- Determination of Ba, Cd, Cu, Pb and Zn in saliva by isotope dilution direct injection inductively coupled plasma mass spectrometry, 1363
- INDUCTIVELY COUPLED PLASMA ATOMIC EMISSION SPECTROMETRY**
- Artefacts in the speciation of sulfides in anoxic sediments, 1805
- INDUCTIVELY COUPLED PLASMA MASS SPECTROMETRY**
- Application of central composite designs for optimisation of the chromatographic separation of monomethylarsonate and dimethylarsinate and of selenomethionine and selenite by ion-pair chromatography coupled with plasma mass spectrometric detection, 594
- A novel sample decomposition technique at atmospheric pressure for the determination of Os abundances in iron meteorites using isotope dilution inductively coupled plasma-mass spectrometry, 846
- Arsenic extraction and speciation in carrots using accelerated solvent extraction, liquid chromatography and plasma mass spectrometry, 1011
- Investigation of arsenic speciation in oyster test reference material by multidimensional HPLC-ICP-MS and electrospray tandem mass spectrometry (ES-MS-MS), 1055

- Determination of Ba, Cd, Cu, Pb and Zn in saliva by isotope dilution direct injection inductively coupled plasma mass spectrometry, 1363
- Extraction chromatographic separations and analysis of actinides using sequential injection techniques with on-line inductively coupled plasma mass spectrometry (ICP-MS) detection, 1594
- Thorium isotopic measurements on silicate rock samples with a multi-collector inductively coupled plasma mass spectrometer, 1707
- INFRARED SPECTROSCOPY**
- Development of an SPME/ATR-IR chemical sensor for detection of phenol type compounds in aqueous solutions, 881
- INK**
- Applicability of surface-enhanced resonance Raman scattering for the direct discrimination of ballpoint pen inks, 1418
- INSECTICIDE**
- Molecularly imprinted polymer sensors for pesticide and insecticide detection in water, 798
- INSULIN-LIKE-GROWTH-FACTOR-I**
- Approach to the determination of insulin-like-growth-factor-I (IGF-I) concentration in plasma by high-performance liquid chromatography-ion trap mass spectrometry: use of a deconvolution algorithm for the quantification of multiprotonated molecules in electrospray ionization, 1996
- INTERLABORATORY COMPARISON**
- International Measurement Evaluation Programme: IMEP-9, trace elements in water, 228
- IODINE**
- Continuous and stopped flow injection for catalytic determination of total iodine in urine, 121
- Colorimetric determination of inorganic iodine in fortified culinary products, 985
- ION CHROMATOGRAPHY**
- Determination of free and total sulfate and phosphate in glycosaminoglycans by column-switching high-performance size-exclusion and ion chromatography and single-column ion chromatography, 169
- A novel ion chromatographic method based on cation-exchange and acid-base interactions for the simultaneous determination of total alkalinity and monovalent cations in samples of  $\mu\text{l}$  volume, 555
- High-resolution determination of  $\text{H}^+$  by ion chromatography. Application to the simultaneous determination of  $\text{H}^+$ ,  $\text{Na}^+$ ,  $\text{NH}_4^+$  and  $\text{K}^+$  in acid rain, 821
- Successive non-suppressed ion chromatography of common cations and anions using dual columns with single eluent, 989
- Simultaneous ion chromatographic separation of anions and cations on poly(aspartic acid) functionalized silica, 2119
- ION-EXCHANGE CHROMATOGRAPHY**
- Characteristics of a column suitable for capacity gradient chromatography with a borate eluent, 465
- Simultaneous ion-exclusion chromatography and cation-exchange chromatography of anions and cations in environmental water samples on a weakly acidic cation-exchange resin by elution with pyridine-2,6-dicarboxylic acid, 567
- Evaluation of column temperature as a means to alter selectivity in the cation exchange separation of alkali metals, alkaline earth metals and amines, 2113
- ION-EXCLUSION CHROMATOGRAPHY**
- Simultaneous ion-exclusion chromatography and cation-exchange chromatography of anions and cations in environmental water samples on a weakly acidic cation-exchange resin by elution with pyridine-2,6-dicarboxylic acid, 567
- ION MOBILITY SPECTROMETER**
- The response of a membrane inlet ion mobility spectrometer to chlorine and the effect of water contamination of the drying media on ion mobility spectrometric responses to chlorine, 1539
- ION-PAIR CHROMATOGRAPHY**
- Application of central composite designs for optimisation of the chromatographic separation of monomethylarsonate and dimethylarsinate and of selenomethionine and selenite by ion-pair chromatography coupled with plasma mass spectrometric detection, 594
- ION-SELECTIVE ELECTRODE**
- Response mechanism of a neutral carrier  $\text{Hg}(\text{II})$  polymeric membrane ion-selective electrode. SEM and EDAX study, 501
- Silver(I) ion-selective membrane based on Schiff base-*p-tert*-butylcalix[4]arene, 505
- Construction and application of phenytoin anion-selective electrode based on bulk acoustic wave (BAW) sensing technique, 1090
- $\text{S}_2\text{O}_2$  donor cyclic and acyclic ionophores: Potentiometric sensing for  $\text{Ag}(\text{I})$  and a new nitrate-bridged dimeric  $\text{Ag}(\text{I})$  complex of the acyclic ionophore with an unusual structure, 1773
- Effect of dissolved  $\text{CO}_2$  on the potential stability of all-solid-state ion-selective electrodes, 2040
- Nickel hexacyanoferrate membrane as a coated wire cation-selective electrode, 2168
- ION TRANSFER**
- Zeolite-membrane modulation of simple and facilitated ion transfer, 1857
- ION TRAP**
- Multi-residue analysis of avermectins and moxidectin by ion-trap LC-MS<sup>n</sup>, 155
- Report by the Analytical Methods Committee. Evaluation of analytical instrumentation. Part XV. Instrumentation for gas chromatography-ion-trap mass spectrometry, 953
- Trace level analysis of polycyclic aromatic hydrocarbons in surface waters by solid phase extraction (SPE) and gas chromatography-ion trap mass spectrometry (GC-ITMS), 1974
- Approach to the determination of insulin-like-growth-factor-I (IGF-I) concentration in plasma by high-performance liquid chromatography-ion trap mass spectrometry: use of a deconvolution algorithm for the quantification of multiprotonated molecules in electrospray ionization, 1996
- IRON**
- Micro sequential injection: fermentation monitoring of ammonia, glycerol, glucose, and free iron using the novel lab-on-valve system, 291
- A robust multi-syringe system for process flow analysis. Part 3. Time based injection applied to the spectrophotometric determination of nickel(II) and iron speciation, 903
- $\text{Fe}(\text{II})$ -EDTA chelate-induced aromatic hydroxylation of terephthalate as a new method for the evaluation of hydroxyl radical-scavenging ability, 928
- Development of SdFFF-ETAAS for characterising soil and sediment colloids, 1588
- Electrochemistry of iron oxide pigments (earth) from pictorial microsamples attached to graphite-polyester composite electrodes, 1764
- IRON METEORITES**
- A novel sample decomposition technique at atmospheric pressure for the determination of Os abundances in iron meteorites using isotope dilution inductively coupled plasma-mass spectrometry, 846
- ISATIN**
- Fluorimetric determination of isatin in human urine and serum by liquid chromatography postcolumn photoirradiation, 33
- ISOCYANATE**
- Exposure to 4,4'-methylenediphenyl diisocyanate (MDI) during moulding of rigid polyurethane foam: determination of airborne MDI and urinary 4,4'-methylenedianiline (MDA), 476
- ISOTACHOPHORESIS**
- Determination of metal cations on miniaturised planar polymeric separation devices using isotachopheresis with integrated conductivity detection, 433
- ISOTOPE**
- Thorium isotopic measurements on silicate rock samples with a multi-collector inductively coupled plasma mass spectrometer, 1707
- ISOTOPE ABUNDANCE**
- Determination of the abundance of  $\delta^{15}\text{N}$  in nitrate ion in contaminated groundwater samples using an elemental analyzer coupled to a mass spectrometer, 1051
- ISOTOPE DILUTION**
- Simplified method for the determination of Ru, Pd, Re, Os, Ir and Pt in chromitites and other geological materials by isotope dilution ICP-MS and acid digestion, 322
- A novel sample decomposition technique at atmospheric pressure for the determination of Os abundances in iron meteorites using isotope dilution inductively coupled plasma-mass spectrometry, 846
- ISOTOPE DILUTION MASS SPECTROMETRY**
- International Measurement Evaluation Programme: IMEP-9, trace elements in water, 228
- KINETICS**
- Error-compensated kinetic determinations by detecting the reagent in successive reactions, 690
- Multi-component kinetic-spectrophotometric analysis. Selection of wavelength and time ranges, 1135
- LABORATORY INFORMATION MANAGEMENT**
- Practical approach to archival and retrieval of analytical data in the laboratory, 1194
- LACTATE**
- On-line continuous monitoring of glucose or lactate by ultraslow microdialysis combined with a flow-through nanoliter biosensor based on poly(*m*-phenylenediamine) ultra-thin polymer membrane as enzyme electrode, 1073
- LACTIC ACIDS**
- Stopped-flow Fourier-transform infra-red spectrometric speciation of glycolic and lactic acids in cosmetic formulations, 1428
- LANTHANIDES**
- Enzyme-linked immunosorbent assays based on peroxidase labels and enzyme-amplified lanthanide luminescence detection, 175
- LEAD**
- Simultaneous determination of  $\text{Cd}(\text{II})$ ,  $\text{Cu}(\text{II})$  and  $\text{Pb}(\text{II})$  in surface waters by solid phase extraction and flow injection analysis with spectrophotometric detection, 1149
- Highly sensitive spectrofluorimetric determination of trace amounts of lead with a new fluorescent reagent, 2-hydroxy-1-naphthaldehyde-8-aminoquinoline, 1164
- Determination of Ba, Cd, Cu, Pb and Zn in saliva by isotope dilution direct injection inductively coupled plasma mass spectrometry, 1363
- Nanocomposite electrodes made of carbon nanofibers and black wax. Anodic stripping voltammetry of zinc and lead, 1878

# LEAD OXIDE

Raman spectroscopy as a means for the identification of plattnerite ( $\text{PbO}_2$ ), of lead pigments and of their degradation products, 222

# LEAD PIGMENTS

Raman spectroscopy as a means for the identification of plattnerite ( $\text{PbO}_2$ ), of lead pigments and of their degradation products, 222

# LEAST MEDIAN SQUARES

Robust linear regression taking into account errors in the predictor and response variables, 1113

# LEATHER

Determination of fat in leather by the use of supercritical fluid extraction combined with on-line piezoelectric detection, 938

# LEUCITE

Analysis of luminescence spectra of leucite ( $\text{KAlSi}_3\text{O}_8$ ), 911

# LICHEN

Analysis of radioactive particles from the Kola Bay area, 724

# LINEZOLID

Determination of linezolid in human plasma by LC-MS-MS, 609

# LIPASE

Quick regiospecific analysis of fatty acids in triacylglycerols with GC using 1,3-specific lipase in butanol, 1032

# LIPIDS

Evaluation of dialysis as a technique for the removal of lipids prior to the GC determination of *ortho*- and non-*ortho*-chlorobiphenyls, using  $^{14}\text{C}$ -labelled congeners, 829

# LIPOPROTEIN

Assessment of the fifth ligand-binding repeat (LR5) of the LDL receptor as an analytical reagent for LDL binding, 329

# LIQUID CHROMATOGRAPHY

Multi-residue analysis of avermectins and moxidectin by ion-trap LC-MS<sup>n</sup>, 155

Sensitive determination of methylenedioxylated amphetamines by liquid chromatography, 581

Automated on-line in-tube solid-phase microextraction followed by liquid chromatography/electrospray ionization-mass spectrometry for the determination of chlorinated phenoxy acid herbicides in environmental waters, 602

Determination of linezolid in human plasma by LC-MS-MS, 609

Arsenic extraction and speciation in carrots using accelerated solvent extraction, liquid chromatography and plasma mass spectrometry, 1011

An integrated electrochemical capillary liquid chromatography-dual microelectrode system for bromine based reaction detection, 1252

Retention characteristics of porous graphitic carbon in reversed-phase liquid chromatography with methanol-water mobile phases, 1318

Development and validation of a method for the determination of sub-additive levels of virginiamycin in compound animal feeds by liquid chromatography, 1332

Simultaneous determination of morphine and its glucuronides in rat hair and rat plasma by reversed-phase liquid chromatography with electrospray ionization mass spectrometry, 1339

Determination of aliphatic amines in water by liquid chromatography using solid-phase extraction cartridges for preconcentration and derivatization, 1683

Development of an LC/MS method for the trace analysis of hexamethylenetriperoxidediamine (HMTD), 1689

Efficient and sensitive screening and confirmation of residues of selected polyether ionophore antibiotics in liver and eggs by liquid chromatography-electrospray tandem mass spectrometry, 1990

Statistical and probabilistic approaches to confidence intervals of linear calibration in liquid chromatography, 2061

Determination of biogenic amines in wine by multidimensional liquid chromatography with online derivatization, 1214

Development and validation of a liquid chromatography-electrospray tandem mass spectrometry method for mebendazole and its metabolites hydroxymebendazole and aminomebendazole in sheep liver, 2144

Uncertainty estimation on the quantification of major milk proteins by liquid chromatography, 2178

# LIQUID-LIQUID EXTRACTION

Homogeneous liquid-liquid extraction method for the selective spectrofluorimetric determination of trace amounts of tryptophan, 703

# LITHIUM

Specific fluorescence determination of lithium ion based on 2-(2-hydroxyphenyl)benzoxazole, 1499

# LIVER

Robotic enzyme amplification: a comparison of some kinetic properties of bovine liver, *Candida utilis* and *Proteus sp.* glutamic dehydrogenases, 855

Efficient and sensitive screening and confirmation of residues of selected polyether ionophore antibiotics in liver and eggs by liquid chromatography-electrospray tandem mass spectrometry, 1990

Development and validation of a liquid chromatography-electrospray tandem mass spectrometry method for mebendazole and its metabolites hydroxymebendazole and aminomebendazole in sheep liver, 2144

# LUMINESCENCE

Enzyme-linked immunosorbent assays based on peroxidase labels and enzyme-amplified lanthanide luminescence detection, 175

Development of a capillary electrophoresis-77 K luminescence detection system for online spectral identification, 302

Analysis of luminescence spectra of leucite ( $\text{KAlSi}_3\text{O}_8$ ), 911

Study on the co-luminescence system of

Dy-Gd-1,6-bis(1'-phenyl-3'-methyl-5'-pyrazol-4'-one)hexanedione-cetyltrimethylammonium bromide and its analytical application, 1168

# LYSOPHOSPHOLIPIDS

The signal-to-noise ratio as the measure for the quantification of lysophospholipids by matrix-assisted laser desorption/ionisation time-of-flight mass spectrometry, 1042

# LYSOZYME

Real-time monitoring of formaldehyde-induced DNA-lysozyme cross-linking with piezoelectric quartz crystal impedance analysis, 1568

# MAGNETIC BEAD

Magnetic bead-based label-free electrochemical detection of DNA hybridization, 2020

# MANGANESE

Separation and preconcentration of  $\text{Mn}^{\text{VII}}/\text{Mn}^{\text{II}}$  speciation on crosslinked chitosan and determination by flame atomic absorption spectrometry, 239

Determination of manganese in water samples by flame atomic absorption spectrometry after cloud point extraction, 534

Soluble manganese(IV); a new chemiluminescence reagent, 1636

# MASS SPECTROMETRY

Searching the *Porphyromonas gingivalis* genome with peptide fragmentation mass spectra, 52

Multi-residue analysis of avermectins and moxidectin by ion-trap LC-MS<sup>n</sup>, 155

Investigations of the origins of estrogenic A-ring aromatic steroids in UK sewage treatment works effluents, 285

Liquid chromatography with post-column electrochemical treatment and mass spectrometric detection of non-polar compounds, 288

N-Isobutyloxycarbonylation for improved detection of

3'-hydroxystanazolol and its 17-epimer in doping control, 306

Development of an analytical technique and stability evaluation of 143  $\text{C}_1$ - $\text{C}_{12}$  volatile organic compounds in Summa® canisters by gas chromatography-mass spectrometry, 310

Simplified method for the determination of Ru, Pd, Re, Os, Ir and Pt in chromites and other geological materials by isotope dilution ICP-MS and acid digestion, 322

Exposure to 4,4'-methylenediphenyl diisocyanate (MDI) during moulding of rigid polyurethane foam: determination of airborne MDI and urinary 4,4'-methylenedianiline (MDA), 476

Application of central composite designs for optimisation of the chromatographic separation of monomethylarsenate and dimethylarsinate and of selenomethionine and selenite by ion-pair chromatography coupled with plasma mass spectrometric detection, 594

Automated on-line in-tube solid-phase microextraction followed by liquid chromatography/electrospray ionization-mass spectrometry for the determination of chlorinated phenoxy acid herbicides in environmental waters, 602

Determination of linezolid in human plasma by LC-MS-MS, 609

Analysis of badger urine volatiles using gas chromatography-mass spectrometry and pattern recognition techniques, 615

Determination of phytochelutins by capillary zone electrophoresis with electrospray tandem mass spectrometry detection (CZE-ES MS/MS), 624

Determination of U-236 in sediment samples by accelerator mass spectrometry, 633

Investigation of heroin profiling using trace organic impurities, 679

Determination of linear alkylbenzene sulfonates and their polar carboxylic degradation products in sewage treatment plants by automated solid-phase extraction followed by capillary electrophoresis-mass spectrometry, 825

Trace level determination of phenols as pentafluorobenzyl derivatives by gas chromatography-negative-ion chemical ionization mass spectrometry, 835

The determination of six taste and odour compounds in water using Ambersorb 572 and high resolution mass spectrometry, 840

A novel sample decomposition technique at atmospheric pressure for the determination of Os abundances in iron meteorites using isotope dilution inductively coupled plasma-mass spectrometry, 846

Report by the Analytical Methods Committee. Evaluation of analytical instrumentation. Part XV. Instrumentation for gas chromatography-ion-trap mass spectrometry, 953

Arsenic extraction and speciation in carrots using accelerated solvent extraction, liquid chromatography and plasma mass spectrometry, 1011

Regiospecific characterisation of the triacylglycerols in animal fats using high performance liquid chromatography-atmospheric pressure chemical ionisation mass spectrometry, 1018

Exposure to 2,4- and 2,6-toluene diisocyanate (TDI) during production of flexible foam: determination of airborne TDI and urinary 2,4- and 2,6-toluenediamine (TDA), 1025

Negative ion chemical ionization GC/MS-MS analysis of dialkylphosphate metabolites of organophosphate pesticides in urine of non-occupationally exposed subjects, 1037

The signal-to-noise ratio as the measure for the quantification of lysophospholipids by matrix-assisted laser desorption/ionisation time-of-flight mass spectrometry, 1042

Determination of the abundance of  $\delta^{15}\text{N}$  in nitrate ion in contaminated

- groundwater samples using an elemental analyzer coupled to a mass spectrometer, 1051
- Investigation of arsenic speciation in oyster test reference material by multidimensional HPLC-ICP-MS and electrospray tandem mass spectrometry (ES-MS-MS), 1055
- Amino acid quantitation in aqueous matrices *via* trap and release membrane introduction mass spectrometry: homocysteine in human plasma, 1212
- Selective ultra-trace detection of NO and NO<sub>2</sub> in complex gas mixtures using broad-bandwidth REMPI mass spectrometry, 1221
- Simultaneous determination of morphine and its glucuronides in rat hair and rat plasma by reversed-phase liquid chromatography with electrospray ionization mass spectrometry, 1339
- Potential for the speciation of Zn using fast protein liquid chromatography (FPLC) and convective interaction media (CIM) fast monolithic chromatography with FAAS and electrospray (ES)-MS-MS detection, 1346
- Electrospray ionisation-mass spectrometry of hydroxamate siderophores, 1359
- Determination of Ba, Cd, Cu, Pb and Zn in saliva by isotope dilution direct injection inductively coupled plasma mass spectrometry, 1363
- Multiresidue analysis of pesticides in vegetables and fruits using two-layered column with graphitized carbon and water absorbent polymer, 1529
- Phenolics in selected European hardwood species by liquid chromatography-electrospray ionisation mass spectrometry, 1535
- A study of the effect of pH, solvent system, cone potential and the addition of crown ethers on the formation of the monensin protonated parent ion in electrospray mass spectrometry, 1630
- Determination of trace amounts of off-flavor compounds in drinking water by stir bar sorptive extraction and thermal desorption GC-MS, 1652
- Determination of organochlorine pesticides in river water by gas chromatography-negative-ion chemical-ionization mass spectrometry using large volume injection, 1658
- Simultaneous determination of ammonia, aliphatic amines, aromatic amines and phenols at  $\mu\text{g l}^{-1}$  levels in environmental waters by solid-phase extraction of their benzoyl derivatives and gas chromatography-mass spectrometry, 1663
- A new method for analysis of coke on catalysts, 1669
- Development of an LC/MS method for the trace analysis of hexamethylenetriperoxidediamine (HMTD), 1689
- Trace level analysis of polycyclic aromatic hydrocarbons in surface waters by solid phase extraction (SPE) and gas chromatography-ion trap mass spectrometry (GC-ITMS), 1974
- Single-sided membrane introduction mass spectrometry for on-line determination of semi-volatile organic compounds in air, 1980
- Development and validation of a method for the confirmation of nicarbazin in chicken liver and eggs using LC-electrospray MS-MS according to the revised EU criteria for veterinary drug residue analysis, 1985
- Approach to the determination of insulin-like-growth-factor-I (IGF-I) concentration in plasma by high-performance liquid chromatography-ion trap mass spectrometry: use of a deconvolution algorithm for the quantification of multiprotonated molecules in electrospray ionization, 1996
- MATHEMATICS**
- Investigation of heroin profiling using trace organic impurities, 679
- Error-compensated kinetic determinations by detecting the reagent in successive reactions, 690
- Simulation of the microdisc problem in spherical co-ordinates. Application to electrochemiluminescence homogeneous analysis, 1888
- MEASUREMENT UNCERTAINTY**
- Response surface modelling and kinetic studies for the experimental estimation of measurement uncertainty in derivatisation, 199
- MEAT**
- A new electrochemical enzyme-linked immunosorbent assay for the screening of macrolide antibiotic residues in bovine meat, 1942
- MEMBRANE INLET**
- The response of a membrane inlet ion mobility spectrometer to chlorine and the effect of water contamination of the drying media on ion mobility spectrometric responses to chlorine, 1539
- MEMBRANE INTRODUCTION MASS SPECTROMETRY**
- Single-sided membrane introduction mass spectrometry for on-line determination of semi-volatile organic compounds in air, 1980
- MERCURY**
- Response mechanism of a neutral carrier Hg(II) polymeric membrane ion-selective electrode, SEM and EDAX study, 501
- Flow injection analysis of mercury(II) based on enzyme inhibition and thermometric detection, 1612
- Study of matrix influence on supercritical fluid extraction of polar mercury species from solid samples, 1694
- Optimization of the simultaneous batch determinations of Bi(III), Hg(II) and Cu(II) at an epoxy-graphite electrode bulk modified with 2-mercaptobenzothiazole, 2172
- METAL**
- Characterization of Galician (N.W. Spain) quality brand potatoes: a comparison study of several pattern recognition techniques, 97
- Microchip separations of transition metal ions *via* LED absorbance detection of their PAR complexes, 429
- Determination of metal cations on miniaturised planar polymeric separation devices using isotachopheresis with integrated conductivity detection, 433
- Metal fractionation in olive oil and urban sewage sludges using the three-stage BCR sequential extraction method and microwave single extractions, 1304
- Expanding the scope of chemical vapor generation for noble and transition metals, 1833
- Authentication of Galician (N.W. Spain) quality brand potatoes using metal analysis. Classical pattern recognition techniques *versus* a new vector quantization-based classification procedure, 2186
- METAL COMPLEX**
- Implementation of a chemical equilibrium constraint in the multivariate curve resolution of voltammograms from systems with successive metal complexes, 371
- METHANOL**
- Cyclodextrin derivative-coated quartz crystal microbalances for alcohol sensing and application as methanol sensors, 1716
- METHYLMERCURY**
- Microwave treatment of biological samples for methylmercury determination by high performance liquid chromatography-cold vapour atomic fluorescence spectrometry, 1583
- MICELLAR ELECTROKINETIC CHROMATOGRAPHY**
- Microchip separations of transition metal ions *via* LED absorbance detection of their PAR complexes, 429
- MICRO-ORGANISM**
- The potential of <sup>19</sup>F NMR spectroscopy for rapid screening of cell cultures for models of mammalian drug metabolism, 2103
- MICRO REACTORS**
- The preparation of a series of nitrostilbene ester compounds using micro reactor technology, 7
- The generation of concentration gradients using electroosmotic flow in micro reactors allowing stereoselective chemical synthesis, 11
- Microfabricated reactors for on-chip heterogeneous catalysis, 21
- Microchip-based synthesis and analysis: Control of multicomponent reaction products and intermediates, 24
- MICRO TOTAL ANALYTICAL SYSTEM**
- Carbon paste-based electrochemical detectors for microchip capillary electrophoresis/electrochemistry, 277
- Embossed polymer leaky waveguide devices for spectroscopic analysis, 1293
- MICROCHIP**
- Glucose biochip: dual analyte response in connection to two pre-column enzymatic reactions, 1203
- MICROCYSTINS**
- A capillary zone electrophoretic method for the study of formation of a covalent conjugate between microcystin LR and protein phosphatase 2A, 1001
- Generic microcystin immunoassay based on monoclonal antibodies against Adda, 2002
- MICRODIALYSIS**
- On-line continuous monitoring of glucose or lactate by ultraslow microdialysis combined with a flow-through nanoliter biosensor based on poly(*m*-phenylenediamine) ultra-thin polymer membrane as enzyme electrode, 1073
- Diffusion and calibration properties of microdialysis sampling membranes in biological media, 1261
- MICRODISC**
- Simulation of the microdisc problem in spherical co-ordinates. Application to electrochemiluminescence homogeneous analysis, 1888
- MICROFLOW ANALYSER**
- Micro sequential injection: environmental monitoring of nitrogen and phosphate in water using a "Lab-on-Valve" system furnished with a microcolumn, 1947
- MICROFLUIDIC DEVICE**
- Conductivity detection for monitoring mixing reactions in microfluidic devices, 1248
- Velocity measurement of particulate flow in microfluidic channels using single point confocal fluorescence detection, 1953
- MICROORGANISM**
- Dot-blot amperometric genosensor for detecting a novel determinant of  $\beta$ -lactamase resistance in *Staphylococcus aureus*, 1551
- MICROREACTOR**
- Electric field-induced mobilisation of multiphase solution systems based on the nitration of benzene in a micro reactor, 14
- Preliminary studies into the direct interfacing of a microreactor to a gas chromatographic instrument, 133
- MICROSCALE**
- A two-electrode configuration for simplified amperometric detection in a microfabricated electrophoretic separation device, 147
- Micro sequential injection: fermentation monitoring of ammonia, glycerol, glucose, and free iron using the novel lab-on-valve system, 291
- Conductivity detection for monitoring mixing reactions in microfluidic devices, 1248
- Embossed polymer leaky waveguide devices for spectroscopic analysis, 1293

Micro sequential injection: environmental monitoring of nitrogen and phosphate in water using a "Lab-on-Valve" system furnished with a microcolumn, 1947

#### MICROWAVE-ASSISTED EXTRACTION

Recent extraction techniques for solid matrices—supercritical fluid extraction, pressurized fluid extraction and microwave-assisted extraction: their potential and pitfalls, 1182

Microwave-assisted extraction of monomethyl arsonic acid from soil and sediment standard reference materials, 1511

#### MICROWAVE DECOMPOSITION

Microwave driven ultraviolet photo-decomposition of organophosphate species, 141

#### MICROWAVE DIGESTION

Microwave treatment of biological samples for methylmercury determination by high performance liquid chromatography—cold vapour atomic fluorescence spectrometry, 1583

#### MILK

Immunodetection of lactosylated proteins as a useful tool to determine heat treatment in milk samples, 66

Copper fractionation by SEC-HPLC and ETAAS: Study of breast milk and infant formulae whey used in lactation of full-term newborn infants, 571

Flow injection analysis of L-lactate in milk and yoghurt by on-line microdialysis and amperometric detection at a disposable biosensor, 866

Uncertainty estimation on the quantification of major milk proteins by liquid chromatography, 2178

#### MINIATURIZATION

Electric field-induced mobilisation of multiphase solution systems based on the nitration of benzene in a micro reactor, 14

Microchip-based synthesis and analysis: Control of multicomponent reaction products and intermediates, 24

Carbon paste-based electrochemical detectors for microchip capillary electrophoresis/electrochemistry, 277

Micro sequential injection: fermentation monitoring of ammonia, glycerol, glucose, and free iron using the novel lab-on-valve system, 291

Determination of metal cations on miniaturised planar polymeric separation devices using isotachopheresis with integrated conductivity detection, 433

#### MODELLING

Implementation of a chemical equilibrium constraint in the multivariate curve resolution of voltammograms from systems with successive metal complexes, 371

Simulation of the microdisc problem in spherical co-ordinates.

Application to electrochemiluminescence homogeneous analysis, 1888

#### MODELLING PARAMETERS

Determination of physical properties of bitumens by use of near-infrared spectroscopy with neural networks. Joint modelling of linear and non-linear parameters, 378

#### MODIFIED FILM

Optical biosensors based on Prussian Blue films, 1080

#### MOLECULAR IMPRINTING

Systematic study of steric and spatial contributions to molecular recognition by non-covalent imprinted polymers, 793

#### MOLECULAR PATTERNING

Molecular patterning on carbon based surfaces through photobiotin activation, 195

#### MOLECULAR RECOGNITION

Systematic study of steric and spatial contributions to molecular recognition by non-covalent imprinted polymers, 793

#### MOLECULARLY IMPRINTED POLYMER

Development of a thickness shear mode acoustic sensor based on an electrosynthesized molecularly imprinted polymer using an underivatized amino acid as the template, 189

A piezoelectric biomimetic sensor for aminopyrine with a molecularly imprinted polymer coating, 664

Molecularly imprinted polymers in analytical chemistry, 747

Towards the development of molecularly imprinted artificial receptors for the screening of estrogenic chemicals, 760

Synthetic receptors as sensor coatings for molecules and living cells, 766

Novel polymeric membranes having chiral recognition sites converted from tripeptide derivatives, 775

Effect of solvent composition on chiral recognition ability of molecularly imprinted DIDE derivatives, 781

Evaluation of methods aimed at complete removal of template from molecularly imprinted polymers, 784

Molecularly imprinted polymer sensors for pesticide and insecticide detection in water, 798

Thin layer molecularly imprinted microfiltration membranes by photofunctionalization using a coated  $\alpha$ -cleavage photoinitiator, 803

Recognition of ephedrine enantiomers by molecularly imprinted polymers designed using a computational approach, 1826

Towards the development of molecularly imprinted polymer based screen-printed sensors for metabolites of PAHs, 1936

#### MOLYBDENUM

Determination of molybdenum in steel by adsorptive stripping voltammetry in a homogeneous ternary solvent system, 892

Spectrophotometric determination of trace molybdenum in plants and seeds with 3,5-dibromo-4-hydroxyphenylfluorone, 1154

#### MONENSIN

A study of the effect of pH, solvent system, cone potential and the addition of crown ethers on the formation of the monensin protonated parent ion in electrospray mass spectrometry, 1630

#### MONOCLONAL ANTIBODY

Production of monoclonal antibodies against a major purgative component, sennoside B, their characterization and use in ELISA, 1372

Generic microcystin immunoassay based on monoclonal antibodies against Adda, 2002

#### MONOFLUOROPHOSPHATES

Rapid flow injection spectrophotometric determination of monofluorophosphates in toothpastes after on-line hydrolysis by alkaline phosphatase immobilized on a cellulose nitrate membrane, 1608

#### MONOSACCHARIDES

Study of the separation and determination of monosaccharides in soluble coffee by capillary zone electrophoresis with electrochemical detection, 298

#### MORIN

Interaction of morin—cetyltrimethylammonium bromide with nucleic acids and determination of nucleic acids at nanograms per milliliter levels based on the enhancement of preresonance light scattering, 1367

#### MORPHOLINE

Determination of morpholine in air by derivatisation with 1-naphthylisothiocyanate and HPLC analysis, 152

#### MULTICOMPONENT MIXTURE

Sustained prediction ability of net analyte preprocessing methods using reduced calibration sets. Theoretical and experimental study involving the spectrophotometric analysis of multicomponent mixtures, 1105

#### MULTIDIMENSIONAL LIQUID CHROMATOGRAPHY

Investigation of arsenic speciation in oyster test reference material by multidimensional HPLC-ICP-MS and electrospray tandem mass spectrometry (ES-MS-MS), 1055

#### MULTIPHASE SOLUTION

Electric field-induced mobilisation of multiphase solution systems based on the nitration of benzene in a micro reactor, 14

#### MULTIVARIATE CALIBRATION

Determination of acetonitrile and ethanol in water by guided microwave spectroscopy with multivariate calibration, 417

Determination of the content and identity of lidocaine solutions with UV-visible spectroscopy and multivariate calibration, 1142

#### MULTIVARIATE CURVE RESOLUTION

Implementation of a chemical equilibrium constraint in the multivariate curve resolution of voltammograms from systems with successive metal complexes, 371

#### MUSSEL

A microbiological six-plate method for the identification of certain antibiotic groups in incurred kidney and muscle samples, 641

#### NADH

Electrochemiluminescence of tris(2,2'-bipyridine)ruthenium(II) immobilized in poly(*p*-styrenesulfonate)—silica—Triton X-100 composite thin-films, 1095

#### NANOTECHNOLOGY

Biochemically functionalized silica nanoparticles, 1274

#### NAPHTHALENE SULFONATES

Large-volume sample stacking for on-capillary sample enrichment in the determination of naphthalene- and benzenesulfonates in real water samples by capillary zone electrophoresis, 1312

#### NAPROXEN

Determination of naproxen in pharmaceutical preparations by room-temperature phosphorescence. A comparative study of several organized media, 917

#### NEAR-INFRARED DIFFUSE REFLECTANCE SPECTROSCOPY

Influence of the procedure used to prepare the calibration sample set on the performance of near infrared spectroscopy in quantitative pharmaceutical analyses, 1129

#### NEAR-INFRARED REFLECTANCE SPECTROSCOPY

Near infrared reflectance spectroscopy for the fast identification of PVC-based films, 1122

#### NEAR-INFRARED SPECTROSCOPY

Determination of physical properties of bitumens by use of near-infrared spectroscopy with neural networks. Joint modelling of linear and non-linear parameters, 378

Determination of indomethacin polymorphic contents by chemometric near-infrared spectroscopy and conventional powder X-ray diffractometry, 1578

Application of artificial neural networks to the classification of soils from São Paulo state using near-infrared spectroscopy, 2194

Near-infrared transmittance spectroscopy for radiochemical ageing of EPDM, 2201

Application of transmission near-infrared spectroscopy to uniformity of content testing of intact steroid tablets, 2207

Near-infrared libraries in the pharmaceutical industry: a solution for identity confirmation, 2212

Identification of counterfeit drugs using near-infrared spectroscopy, 2218

**NEBULIZATION**

Expanding the scope of chemical vapor generation for noble and transition metals, 1833

**NEPTUNIUM**

Measurement of  $^{237}\text{Np}$  in environmental water samples by accelerator mass spectrometry, 58

**NET ANALYTE PREPROCESSING**

Sustained prediction ability of net analyte preprocessing methods using reduced calibration sets. Theoretical and experimental study involving the spectrophotometric analysis of multicomponent mixtures, 1105

**NEURAL NETWORKS**

Characterization of Galician (N.W. Spain) quality brand potatoes: a comparison study of several pattern recognition techniques, 97

**NEUTRON ACTIVATION ANALYSIS**

Development of a procedure for measuring nitrogen by cold neutron prompt gamma-ray activation analysis, 217

**NICKEL**

A robust multi-syringe system for process flow analysis. Part 3. Time based injection applied to the spectrophotometric determination of nickel(II) and iron speciation, 903

**NICKEL HEXACYANOFERRATE**

Nickel hexacyanoferrate membrane as a coated wire cation-selective electrode, 2168

**NITRATE**

An integrated relay/nitrate reductase field-effect transistor for the sensing of nitrate ( $\text{NO}_3^-$ ), 652

Determination of nitrite by inhibition of the chemiluminescence of acriflavine in a flow-injection assembly, 1423

**NITRATION**

Electric field-induced mobilisation of multiphase solution systems based on the nitration of benzene in a micro reactor, 14

**NITRIC OXIDE**

A fluorescent probe for monitoring nitric oxide production using a novel detection concept, 564

Preparation of microporous aluminium anodic oxide film modified Pt nano array electrode and application in direct measurement of nitric oxide release from myocardial cells, 871

Amino acid quantitation in aqueous matrices *via* trap and release membrane introduction mass spectrometry: homocysteine in human plasma, 1212

**NITRITE**

A novel flow-through disk-based solid-phase extraction diffuse reflectance optrode. Application to preconcentration and determination of trace levels of nitrite, 1740

**NITROGEN**

Determination of the abundance of  $\delta^{15}\text{N}$  in nitrate ion in contaminated groundwater samples using an elemental analyzer coupled to a mass spectrometer, 1051

Micro sequential injection: environmental monitoring of nitrogen and phosphate in water using a "Lab-on-Valve" system furnished with a microcolumn, 1947

**NITROGEN DIOXIDE**

Amino acid quantitation in aqueous matrices *via* trap and release membrane introduction mass spectrometry: homocysteine in human plasma, 1212

**NITROSTILBENES**

The preparation of a series of nitrostilbene ester compounds using micro reactor technology, 7

**NON-POLAR COMPOUNDS**

Liquid chromatography with post-column electrochemical treatment and mass spectrometric detection of non-polar compounds, 288

**NUCLEAR MAGNETIC RESONANCE**

A new method for analysis of coke on catalysts, 1669

**NUCLEAR MAGNETIC RESONANCE SPECTROSCOPY**

The potential of  $^{19}\text{F}$  NMR spectroscopy for rapid screening of cell cultures for models of mammalian drug metabolism, 2103

Investigation of water environments in a C18 bonded silica phase using  $^1\text{H}$  magic angle spinning (MAS) nuclear magnetic resonance (NMR) spectroscopy, 548

Synthesis of 5-fluorouracil-imprinted polymers with multiple hydrogen bonding interactions, 772

**NUCLEAR WASTE**

Extraction chromatographic separations and analysis of actinides using sequential injection techniques with on-line inductively coupled plasma mass spectrometry (ICP MS) detection, 1594

**NUCLEIC ACID**

Electrochemical detection of sequence-specific DNA using a DNA probe labeled with aminoferrrocene and chitosan modified electrode immobilized with ssDNA, 62

High surface density immobilization of oligonucleotide on silicon, 485

Determination of nucleic acids with Crystal Violet by a resonance light-scattering technique, 513

Determination of nucleic acids based on shifting the association equilibrium between tetrasulfonated aluminium phthalocyanine and Acridine Orange, 518

Interaction of morin-cetyltrimethylammonium bromide with nucleic acids and determination of nucleic acids at nanograms per milliliter levels based on the enhancement of preresonance light scattering, 1367

**NUT**

Optimised uncertainty at minimum overall cost to achieve fitness-for-purpose in food analysis, 1777

**O-DIANISIDINE**

*o*-Dianisidine: a new reagent for selective spectrophotometric, flow injection determination of chlorine, 2087

**OLIVE OIL**

Determination of aliphatic alcohols, squalene,  $\alpha$ -tocopherol and sterols in olive oils: direct method involving gas chromatography of the unsaponifiable fraction following silylation, 472

Metal fractionation in olive oil and urban sewage sludges using the three-stage BCR sequential extraction method and microwave single extractions, 1304

**OPTICAL FIBRE**

Optical fibre biosensors based on immobilised enzymes, 1469

**OPTODE**

Picric acid sensitive optode based on a fluorescence carrier covalently bound to membrane, 349

**OPTRODE**

A novel flow-through disk-based solid-phase extraction diffuse reflectance optrode. Application to preconcentration and determination of trace levels of nitrite, 1740

**ORGANOPHOSPHATES**

Microwave driven ultraviolet photo-decomposition of organophosphate species, 141

**OSMIUM**

A novel sample decomposition technique at atmospheric pressure for the determination of Os abundances in iron meteorites using isotope dilution inductively coupled plasma-mass spectrometry, 846

**OTILONIUM BROMIDE**

Optimisation and validation of a capillary electrophoresis method for the simultaneous determination of diazepam and otilonium bromide, 1700

**OVALBUMIN**

Small volume bead assay for ovalbumin with electrochemical detection, 337

**OXALATE**

Electrochemiluminescence of tris(2,2'-bipyridine)ruthenium(II) immobilized in poly(*p*-styrenesulfonate)-silica-Triton X-100 composite thin-films, 1095

**OXYGEN**

A novel nano-Au-assembled gas sensor for atmospheric oxygen determination, 1747

**OYSTER**

Investigation of arsenic speciation in oyster test reference material by multidimensional HPLC-ICP-MS and electrospray tandem mass spectrometry (ES-MS-MS), 1055

**PARTIAL LEAST SQUARES**

Multivariate data analysis of quality parameters in drinking water, 91

Application of chemometric techniques to the characterisation of impregnated materials obtained following supercritical fluid technology, 1792

**PEAK PROFILE**

Oscillatory control of sample dispersion in a continuous flow system, 394

**PEPTIDE**

An integrated electrochemical capillary liquid chromatography-dual microelectrode system for bromine based reaction detection, 1252

**PERMANGANATE**

Electrochemical titrations of thiosulfate, sulfite, dichromate and permanganate using dual microband electrodes, 86

**PEROVSKITE**

Microstructural and surface characterization of solid state sensor based on  $\text{LaFeO}_{3-x}$  oxide for detection of  $\text{NO}_2$ , 1377

**PEROXIDASE**

Peroxidase enzyme sensor for on-line monitoring of disinfection processes in the food industry, 1733

**PEROXIDE**

A rapid method for peroxide value determination in edible oils based on flow analysis with Fourier transform infrared spectroscopic detection, 242

Peroxidase enzyme sensor for on-line monitoring of disinfection processes in the food industry, 1733

**PESTICIDE**

Gas chromatographic determination of pesticides in vegetable samples by sequential positive and negative chemical ionization and tandem mass spectrometric fragmentation using an ion trap analyser, 46

Expression of results with uncertainty for the determination of pesticides in melon - experience in a proficiency test, 743

Molecularly imprinted polymer sensors for pesticide and insecticide detection in water, 798

Simultaneous optimization of the solid-phase extraction of organochlorine and organophosphorus pesticides using the desirability function, 1005

Negative ion chemical ionization GC/MS-MS analysis of dialkylphosphate metabolites of organophosphate pesticides in urine of non-occupationally exposed subjects, 1037

Monitoring of 6-chloronicotinic acid in human urine by gas chromatography-tandem mass spectrometry as indicator of exposure to the pesticide imidacloprid, 1355

Multiresidue analysis of pesticides in vegetables and fruits using

- two-layered column with graphitized carbon and water absorbent polymer, 1529
- Determination of organochlorine pesticides in river water by gas chromatography-negative-ion chemical-ionization mass spectrometry using large volume injection, 1658
- PH**
- Enzymatic reactions for the determination of sugars in food samples using the differential pH technique, 2149
- PHARMACEUTICAL**
- Flow injection manifold for the direct spectrophotometric determination of bismuth in pharmaceutical products using Methylthymol Blue as a chromogenic reagent, 247
- Electrochemical studies and differential pulse polarographic analysis of lansoprazole in pharmaceuticals, 361
- Near infrared reflectance spectroscopy for the fast identification of PVC-based films, 1122
- Influence of the procedure used to prepare the calibration sample set on the performance of near infrared spectroscopy in quantitative pharmaceutical analyses, 1129
- Determination of the content and identity of lidocaine solutions with UV-visible spectroscopy and multivariate calibration, 1142
- Spectrophotometric determination of trace aluminium content in parenteral solutions by combined cloud point preconcentration-flow injection analysis, 1172
- Reagentless chemiluminescence flow sensor for the determination of riboflavin in pharmaceutical preparations and human urine, 1393
- Dot-blot amperometric genosensor for detecting a novel determinant of  $\beta$ -lactamase resistance in *Staphylococcus aureus*, 1551
- Determination of indomethacin polymorphic contents by chemometric near-infrared spectroscopy and conventional powder X-ray diffractometry, 1578
- High temperature reversed-phase HPLC using deuterium oxide as a mobile phase for the separation of model pharmaceuticals with multiple on-line spectroscopic analysis (UV, IR,  $^1\text{H-NMR}$  and MS), 1625
- Optimisation and validation of a capillary electrophoresis method for the simultaneous determination of diazepam and otilonium bromide, 1700
- Quartz crystal resonant sensor (QCRS) model for label-free, small molecules—receptor studies, 1711
- Application of transmission near-infrared spectroscopy to uniformity of content testing of intact steroid tablets, 2207
- Near-infrared libraries in the pharmaceutical industry: a solution for identity confirmation, 2212
- PHARMACOKINETICS**
- A direct sensitized fluorimetric determination of 5,10,15,20-tetra(*m*-hydroxyphenyl)chlorin [*m*-THPC (Foscan)®] in human plasma using a cyclodextrin inclusion complex, 923
- PHENETHYLAMINE**
- Chromatographic analysis of phenethylamine-antihistamine combinations using  $\text{C}_{18}$ ,  $\text{C}_{18}$  or cyano columns and micellar sodium dodecyl sulfate-pentanol mixtures, 457
- PHENOL**
- Development of an SPME/ATR-IR chemical sensor for detection of phenol type compounds in aqueous solutions, 881
- Phenolics in selected European hardwood species by liquid chromatography-electrospray ionisation mass spectrometry, 1535
- PHENOLIC COMPOUNDS**
- Trace level determination of phenols as pentafluorobenzyl derivatives by gas chromatography-negative-ion chemical ionization mass spectrometry, 835
- Simultaneous determination of ammonia, aliphatic amines, aromatic amines and phenols at  $\mu\text{g l}^{-1}$  levels in environmental waters by solid-phase extraction of their benzoyl derivatives and gas chromatography-mass spectrometry, 1663
- Amperometric tyrosinase biosensor based on a sol-gel-derived titanium oxide-copolymer composite matrix for detection of phenolic compounds, 1728
- PHENYLTHIOUREA**
- Catalytic hydrogen evolution in cathodic stripping voltammetry on a mercury electrode in the presence of cobalt(II) ion and phenylthiourea or thiourea, 1907
- PHENYTOIN**
- Construction and application of phenytoin anion-selective electrode based on bulk acoustic wave (BAW) sensing technique, 1090
- PHOSPHATE**
- Microwave driven ultraviolet photo-decomposition of organophosphate species, 141
- Determination of free and total sulfate and phosphate in glycosaminoglycans by column-switching high-performance size-exclusion and ion chromatography and single-column ion chromatography, 169
- Simultaneous determination of phosphate and silicate in detergents and waters by first-derivative spectrophotometry, 1810
- Micro sequential injection: environmental monitoring of nitrogen and phosphate in water using a "Lab-on-Valve" system furnished with a microcolumn, 1947
- PHOSPHORESCENCE**
- Direct determination of naftopidil by non-protected fluid room temperature phosphorescence, 234
- Determination of naproxen in pharmaceutical preparations by room-temperature phosphorescence. A comparative study of several organized media, 917
- PHOTOBIOFIN**
- Molecular patterning on carbon based surfaces through photobiotin activation, 195
- PHOTOIRRADIATION**
- Fluorimetric determination of isatin in human urine and serum by liquid chromatography postcolumn photoirradiation, 33
- PHOTOMETRY**
- Coupling of organic elemental analysis with flame photometry for sulfur determination at the nanogram level, 1820
- PHYTOCHELATINS**
- Determination of phytochelatin by capillary zone electrophoresis with electrospray tandem mass spectrometry detection (CZE-ES MS/MS), 624
- PICRIC ACID**
- Picric acid sensitive optode based on a fluorescence carrier covalently bound to membrane, 349
- PIEZOELECTRIC DETECTION**
- Determination of fat in leather by the use of supercritical fluid extraction combined with on-line piezoelectric detection, 938
- PIGMENT**
- Mediaeval cantors in the Valladolid Biblioteca : FT-Raman spectroscopic study, 383
- PLASMA**
- Sensitive determination of methylenedioxyated amphetamines by liquid chromatography, 581
- Integration of microfabricated needle-type glucose sensor devices with a novel thin-film Ag/AgCl electrode and plasma-polymerized thin film: mass production techniques, 658
- Investigation of microcontact transfer of proteins from a selectively plasma treated elastomer stamp by fluorescence microscopy and force microscopy, 1100
- Amino acid quantitation in aqueous matrices *via* trap and release membrane introduction mass spectrometry: homocysteine in human plasma, 1212
- High performance liquid chromatographic determination of mazindol in human plasma, 1963
- Approach to the determination of insulin-like-growth-factor-I (IGF-I) concentration in plasma by high-performance liquid chromatography-ion trap mass spectrometry: use of a deconvolution algorithm for the quantification of multiprotonated molecules in electrospray ionization, 1996
- Direct simultaneous analysis of plasma samples for a drug discovery compound and its hydroxyl metabolite using mixed-function column liquid chromatography-tandem mass spectrometry, 2139
- Selective extraction of blood plasma exchangeable copper for isotope studies of dietary copper absorption, 2225
- PLASTICS**
- Near infrared reflectance spectroscopy for the fast identification of PVC-based films, 1122
- PLATINUM GROUP ELEMENTS**
- Simplified method for the determination of Ru, Pd, Re, Os, Ir and Pt in chromites and other geological materials by isotope dilution ICP-MS and acid digestion, 322
- POLARIMETRY**
- Capillary-scale polarimetry for flowing streams, 673
- POLAROGRAPHY**
- Implementation of a chemical equilibrium constraint in the multivariate curve resolution of voltammograms from systems with successive metal complexes, 371
- POLYCHLORINATED DIBENZO-P-DIOXINS**
- High sensitivity microgravimetric biosensor for qualitative and quantitative diagnostic detection of polychlorinated dibenzo-*p*-dioxins, 71
- Dioxin detection based on immunoassay using a polyclonal antibody against octa-chlorinated dibenzo-*p*-dioxin (OCDD), 1207
- POLYCYCLIC AROMATIC HYDROCARBONS**
- Fast sequential injection determination of benzo[*a*]pyrene using variable angle fluorescence with on-line solid-phase extraction, 451
- UV-detection capillary electrophoresis for benzo[*a*]pyrene and pyrene following a two-step concentration system using homogeneous liquid-liquid extraction and a sweeping method, 551
- Determination of PAH in food samples by HPLC with fluorimetric detection following sonication extraction without sample clean-up, 1326
- A new method for analysis of coke on catalysts, 1669
- Towards the development of molecularly imprinted polymer based screen-printed sensors for metabolites of PAHs, 1936
- Trace level analysis of polycyclic aromatic hydrocarbons in surface waters by solid phase extraction (SPE) and gas chromatography-ion trap mass spectrometry (GC-ITMS), 1974
- POLYELECTROLYTE**
- Stable sensor layers self-assembled onto surfaces using azobenzene-containing polyelectrolytes, 1861
- POLYESTER**
- Headspace gas chromatographic determination of

- 2-alkyl-5,5-dimethyl-1,3-dioxane derivatives in wastewaters of a polyester resin plant, 469
- POLYMER**  
Enantioselective sensor based on microgravimetric quartz crystal microbalance with molecularly imprinted polymer film, 184  
An unexpected selectivity of a propranolol-derived molecular imprint for tamoxifen, 757  
Chemiluminescent flow-through sensor for 1,10-phenanthroline based on the combination of molecular imprinting and chemiluminescence, 810
- POLYMER BEAD**  
Analysis of single polymer beads for solid phase combinatorial synthesis: the determination of reactive thiol and within batch polydispersity of bead loadings, 538
- POLYMER-SUPPORTED COLLOID**  
Disposable, stable media for reproducible surface-enhanced Raman spectroscopy, 1
- POLYMERASE CHAIN REACTION**  
Sequences of *E. coli* O157:H7 detected by a PCR-acoustic wave sensor combination, 2153
- POTASSIUM**  
High-resolution determination of  $H^+$  by ion chromatography. Application to the simultaneous determination of  $H^+$ ,  $Na^+$ ,  $NH_4^+$  and  $K^+$  in acid rain, 821
- POTATO**  
Characterization of Galician (N.W. Spain) quality brand potatoes: a comparison study of several pattern recognition techniques, 97  
Authentication of Galician (N.W. Spain) quality brand potatoes using metal analysis. Classical pattern recognition techniques *versus* a new vector quantization-based classification procedure, 2186
- POTENTIOMETRY**  
Flow injection potentiometric determination of pipazethate hydrochloride, 79  
Non-aqueous potentiometry using zeolites, 733  
Monitoring metal ion contamination onset in hydrofluoric acid using silicon-diamond and dual silicon sensing electrode assembly, 877  
 $S_2O_2$  donor cyclic and acyclic ionophores: Potentiometric sensing for  $Ag(I)$  and a new nitrate-bridged dimeric  $Ag(I)$  complex of the acyclic ionophore with an unusual structure, 1773  
Potentiometric titrations using dual microband electrodes, 1882  
Magnetic bead-based label-free electrochemical detection of DNA hybridization, 2020  
Effect of dissolved  $CO_2$  on the potential stability of all-solid-state ion-selective electrodes, 2040
- PRASEODYMIUM**  
Study of the absorption spectra of the 4f electron transitions of the praseodymium complex with ciprofloxacin and its analytical application, 1440
- PRECONCENTRATION**  
Separation and preconcentration of  $Mn^{VII}/Mn^{II}$  speciation on crosslinked chitosan and determination by flame atomic absorption spectrometry, 239  
UV-detection capillary electrophoresis for benzo[a]pyrene and pyrene following a two-step concentration system using homogeneous liquid-liquid extraction and a sweeping method, 551  
Spectrophotometric determination of trace aluminium content in parenteral solutions by combined cloud point preconcentration-flow injection analysis, 1172  
Separation and preconcentration of chromium species by selective absorption on *Lemma minor* and determination by slurry atomisation electrothermal atomic absorption spectrometry, 1453  
Determination of aliphatic amines in water by liquid chromatography using solid-phase extraction cartridges for preconcentration and derivatization, 1683
- PREDICTION ABILITY**  
Sustained prediction ability of net analyte preprocessing methods using reduced calibration sets. Theoretical and experimental study involving the spectrophotometric analysis of multicomponent mixtures, 1105
- PRERESONANCE LIGHT SCATTERING**  
Interaction of morin-cetyltrimethylammonium bromide with nucleic acids and determination of nucleic acids at nanograms per milliliter levels based on the enhancement of preresonance light scattering, 1367
- PRESSURIZED FLUID EXTRACTION**  
Recent extraction techniques for solid matrices—supercritical fluid extraction, pressurized fluid extraction and microwave-assisted extraction: their potential and pitfalls, 1182
- PRINCIPAL COMPONENT ANALYSIS**  
Multivariate data analysis of quality parameters in drinking water, 91  
Application of chemometric techniques to the characterisation of impregnated materials obtained following supercritical fluid technology, 1792
- PROCESS ANALYSIS**  
Principle of synchronous multistage dispersion sampling and its applications in the continuous determination of components of concentrated and viscous liquid mixtures by atomic absorption spectrometry, 1602
- PROPRANOLOL**  
An unexpected selectivity of a propranolol-derived molecular imprint for tamoxifen, 757
- PROSTATE-SPECIFIC ANTIGEN**  
Novel solution-phase immunoassays for molecular analysis of tumor markers, 1285
- PROTEIN**  
Searching the *Porphyromonas gingivalis* genome with peptide fragmentation mass spectra, 52  
Immunodetection of lactosylated proteins as a useful tool to determine heat treatment in milk samples, 66  
Blood platelet adhesion to protein studied by on-line acoustic wave sensor, 342  
A quartz crystal resonant sensor (QCRS) study of HSA-drug interactions, 426  
Study of the spectrophotometric analysis of protein solution with *p*-iodochlorophosphonazo as adsorbate by the microphase adsorption-spectral correction technique, 528  
Study of the reaction of proteins with Beryllon II- $Al^{III}$  by the Rayleigh light scattering technique and its application, 707  
Investigation of microcontact transfer of proteins from a selectively plasma treated elastomer stamp by fluorescence microscopy and force microscopy, 1100  
A sensitive and rapid method for the determination of protein by the resonance Rayleigh light-scattering technique with Pyrogallol Red, 1444  
Redox modification of proteins using sequential-parallel electrochemistry in microtiter plates, 1912  
Uncertainty estimation on the quantification of major milk proteins by liquid chromatography, 2178
- PRUSSIAN BLUE**  
Optical biosensors based on Prussian Blue films, 1080
- PVC FILM**  
Near infrared reflectance spectroscopy for the fast identification of PVC-based films, 1122
- QUALITY ASSURANCE**  
Measurement of near zero concentration: recording and reporting results that fall close to or below the detection limit, 256
- QUALITY CONTROL**  
Determination of measurement uncertainty for the determination of triazines in groundwater from validation data, 211  
International Measurement Evaluation Programme: IMEP-9, trace elements in water, 228
- QUARTZ CRYSTAL MICROBALANCE**  
High sensitivity microgravimetric biosensor for qualitative and quantitative diagnostic detection of polychlorinated dibenzo-*p*-dioxins, 71  
Enantioselective sensor based on microgravimetric quartz crystal microbalance with molecularly imprinted polymer film, 184  
Amplified detection of DNA and analysis of single-base mismatches by the catalyzed deposition of gold on Au-nanoparticles, 1502  
Quartz crystal resonant sensor (QCRS) model for label-free, small molecules—receptor studies, 1711  
Cyclodextrin derivative-coated quartz crystal microbalances for alcohol sensing and application as methanol sensors, 1716
- QUINONE**  
Electrochemical and spectroscopic characterization of quinone functionalized exfoliated graphite, 1872
- RADIOACTIVITY**  
Analysis of radioactive particles from the Kola Bay area, 724
- RADIUM**  
Determination of  $^{226}Ra$  in biological samples by adsorption on specific adsorbents, 399
- RAMAN SPECTROSCOPY**  
Raman spectroscopy as a means for the identification of plattnerite ( $PbO_2$ ), of lead pigments and of their degradation products, 222  
Quantitative determination of binary and tertiary calcium carbonate mixtures using powder X-ray diffraction, 1118  
Applicability of surface-enhanced resonance Raman scattering for the direct discrimination of ballpoint pen inks, 1418  
Application of SERS spectroscopy to the identification of (3,4-methylenedioxy)amphetamine in forensic samples utilizing matrix stabilized silver halides, 2066
- RARE EARTHS**  
Study of the absorption spectra of the 4f electron transitions of the praseodymium complex with ciprofloxacin and its analytical application, 1440
- RAYLEIGH LIGHT-SCATTERING**  
Study of the reaction of proteins with Beryllon II- $Al^{III}$  by the Rayleigh light scattering technique and its application, 707  
A sensitive and rapid method for the determination of protein by the resonance Rayleigh light-scattering technique with Pyrogallol Red, 1444
- REAGENT**  
Assessment of the fifth ligand-binding repeat (LR5) of the LDL receptor as an analytical reagent for LDL binding, 329
- REFRACTIVE INDEX DETECTION**  
Chip-based refractive index detection using a single point evanescent wave probe, 1505
- RESONANCE LIGHT SCATTERING**  
Determination of nucleic acids with Crystal Violet by a resonance light-scattering technique, 513

**RESULT RECORDING**

Measurement of near zero concentration: recording and reporting results that fall close to or below the detection limit, 256

**RESULT REPORTING**

Measurement of near zero concentration: recording and reporting results that fall close to or below the detection limit, 256

**REVIEW**

Process NMR spectrometry, 260

Analysis of fuel oxygenates in the environment, 405

Molecularly imprinted polymers in analytical chemistry, 747

Inorganic biological analysis by capillary electrophoresis, 964

Recent extraction techniques for solid matrices—supercritical fluid extraction, pressurized fluid extraction and microwave-assisted extraction: their potential and pitfalls, 1182

Optical fibre biosensors based on immobilised enzymes, 1469

Electrochemically modulated liquid chromatography: an electrochemical strategy for manipulating chromatographic retention, 1841

**RIBOFLAVIN**

Reagentless chemiluminescence flow sensor for the determination of riboflavin in pharmaceutical preparations and human urine, 1393

**ROBOTIC ENZYME AMPLIFICATION**

Robotic enzyme amplification: a comparison of some kinetic properties of bovine liver, *Candida utilis* and *Proteus sp.* glutamic dehydrogenases, 855

**ROBUST REGRESSION**

Robust linear regression taking into account errors in the predictor and response variables, 1113

**ROCKS**

Thorium isotopic measurements on silicate rock samples with a multi-collector inductively coupled plasma mass spectrometer, 1707

**SALICYLIC ACID**

Application of chemometric techniques to the characterisation of impregnated materials obtained following supercritical fluid technology, 1792

**SAMPLE DISPERSION**

Oscillatory control of sample dispersion in a continuous flow system, 394

**SAMPLE HANDLING**

Capillary electrophoresis system with flow injection sample introduction and chemiluminescence detection on a chip platform, 281

Uncertainty in sample mass for small numbers of particles from granular materials, 943

Uncertainty in analyte mass for samples containing small numbers of particles, 947

A new test for 'sufficient homogeneity', 1414

Rapid flow injection spectrophotometric determination of monofluorophosphates in toothpastes after on-line hydrolysis by alkaline phosphatase immobilized on a cellulose nitrate membrane, 1608

**SAMPLE PREPARATION**

Microwave driven ultraviolet photo-decomposition of organophosphate species, 141

Artefacts in the speciation of sulfides in anoxic sediments, 1805

**SAMPLING**

Sampling of kidneys from cattle and pigs for cadmium analysis, 114

Automated measurement system for  $H_2O_2$  in the atmosphere by diffusion scrubber sampling and HPLC analysis of  $Ti(IV)$ -PAR- $H_2O_2$  complex, 587

Determination of airborne formaldehyde by active sampling on 3-methyl-2-benzothiazolinone hydrazone hydrochloride-coated glass fibre filters, 720

Diffusion and calibration properties of microdialysis sampling membranes in biological media, 1261

A new test for 'sufficient homogeneity', 1414

Principle of synchronous multistage dispersion sampling and its applications in the continuous determination of components of concentrated and viscous liquid mixtures by atomic absorption spectrometry, 1602

**SCANNING ELECTROCHEMICAL MICROSCOPY**

Visualization of DNA microarrays by scanning electrochemical microscopy (SECM), 1210

**SCINTILLATION**

Development of a glass ampoule system for evaluation of long-term sorption/desorption behavior of vapor phase volatile organic compounds in geosorbents, 1816

**SCREEN-PRINTED CARBON ELECTRODE**

An assay for the enzyme *N*-acetyl- $\beta$ -D-glucosaminidase (NAGase) based on electrochemical detection using screen-printed carbon electrodes (SPCEs), 1866

Towards the development of molecularly imprinted polymer based screen-printed sensors for metabolites of PAHs, 1936

**SEA-WATER**

Altering the selectivity of inorganic anion separations using electrostatic capillary electrophoresis, 28

Determination of the complex stability of zinc with carbonic anhydrase in sea-water, 2036

**SEDIMENTS**

Determination of carbonate in marine solid samples by FTIR-ATR spectroscopy, 144

Determination of U-236 in sediment samples by accelerator mass spectrometry, 633

Analysis of radioactive particles from the Kola Bay area, 724

Microwave-assisted extraction of monomethyl arsonic acid from soil and sediment standard reference materials, 1511

Development of SdFFF-ETAAS for characterising soil and sediment colloids, 1588

Artefacts in the speciation of sulfides in anoxic sediments, 1805

**SELENIUM**

Application of central composite designs for optimisation of the chromatographic separation of monomethylarsonate and dimethylarsinate and of selenomethionine and selenite by ion-pair chromatography coupled with plasma mass spectrometric detection, 594

Determination of the stoichiometry of  $Cu, In, Se$  by total-reflection XRF, 1797

**SELF-ASSEMBLED MONOLAYERS**

Spectroscopic analysis of the tribological behavior of a model boundary layer lubricant, 1269

Disorganised self-assembled monolayers (SAMs): the incorporation of amphiphilic molecules, 1850

**SEMI-VOLATILE ORGANIC COMPOUNDS**

Single-sided membrane introduction mass spectrometry for on-line determination of semi-volatile organic compounds in air, 1980

**SEMICONDUCTOR**

Determination of tellurium in indium antimonide semiconductor material by electrothermal atomic absorption spectrometry, 1449

**SENOSIDE B**

Production of monoclonal antibodies against a major purgative component, senoside B, their characterization and use in ELISA, 1372

**SENSOR**

Enantioselective sensor based on microgravimetric quartz crystal microbalance with molecularly imprinted polymer film, 184

Development of a thickness shear mode acoustic sensor based on an electrosynthesized molecularly imprinted polymer using an underivatized amino acid as the template, 189

Blood platelet adhesion to protein studied by on-line acoustic wave sensor, 342

Picric acid sensitive optode based on a fluorescence carrier covalently bound to membrane, 349

A quartz crystal resonant sensor (QCRS) study of HSA-drug interactions, 426

Silver(I) ion-selective membrane based on Schiff

base-*p*-tert-butylcalix[4]arene, 505

FTIR sensing of inhomogeneous systems using immobilized organometalcarbonyl probe groups, 647

An integrated relay/nitrate reductase field-effect transistor for the sensing of nitrate ( $NO_3^-$ ), 652

A piezoelectric biomimetic sensor for aminopyrine with a molecularly imprinted polymer coating, 664

Determination of sulfur dioxide in vitriol plant wastewater by using a  $PolyNiMe_4TAA$  electrochemically modified Pt microelectrode, 669

Synthetic receptors as sensor coatings for molecules and living cells, 766

Molecularly imprinted polymer sensors for pesticide and insecticide detection in water, 798

Chemiluminescent flow-through sensor for 1,10-phenanthroline based on the combination of molecular imprinting and chemiluminescence, 810

Detection of ferricyanide as a probe for the effect of hematocrit in whole blood biosensors, 861

Monitoring metal ion contamination onset in hydrofluoric acid using silicon-diamond and dual silicon sensing electrode assembly, 877

Development of an SPME/ATR-IR chemical sensor for detection of phenol type compounds in aqueous solutions, 881

Monoparameter sensors for the determination of the antioxidants

butylated hydroxyanisole and *n*-propyl gallate in foods and cosmetics

by flow injection spectrophotometry, 897

Enantioselective molecular sensing of aromatic amines using

tetra-(5)-di-2-naphthylprolinol calix[4]arene, 1063

Enzyme modified microband electrodes: cross-talk effects and their elimination, 1068

Optical biosensors based on Prussian Blue films, 1080

Microstructural and surface characterization of solid state sensor based on  $LaFeO_{3-x}$  oxide for detection of  $NO_2$ , 1377

Detection of chlorinated methanes by tin oxide gas sensors, 1382

Synchronous fluorescence and absorbance dynamic liquid drop sensor for  $Cr(VI)$  determination at the femtomole level, 1387

Reagentless chemiluminescence flow sensor for the determination of riboflavin in pharmaceutical preparations and human urine, 1393

Dot-blot amperometric genosensor for detecting a novel determinant of  $\beta$ -lactamase resistance in *Staphylococcus aureus*, 1551

Real-time monitoring of formaldehyde-induced DNA-lysozyme cross-linking with piezoelectric quartz crystal impedance analysis, 1568

Quartz crystal resonant sensor (QCRS) model for label-free, small molecules—receptor studies, 1711

Cyclodextrin derivative-coated quartz crystal microbalances for alcohol sensing and application as methanol sensors, 1716

- Peroxidase enzyme sensor for on-line monitoring of disinfection processes in the food industry, 1733
- A novel flow-through disk-based solid-phase extraction diffuse reflectance optrode. Application to preconcentration and determination of trace levels of nitrite, 1740
- A novel nano-Au-assembled gas sensor for atmospheric oxygen determination, 1747
- Monitoring of the composting process using a mediator-type biochemical oxygen demand sensor, 1751
- Stable sensor layers self-assembled onto surfaces using azobenzene-containing polyelectrolytes, 1861
- Towards the development of molecularly imprinted polymer based screen-printed sensors for metabolites of PAHs, 1936
- Sequences of *E. coli* O157:H7 detected by a PCR-acoustic wave sensor combination, 2153
- SEPARATION**
- Separation and preconcentration of chromium species by selective absorption on *Lemma minor* and determination by slurry atomisation electrothermal atomic absorption spectrometry, 1453
- SEQUENTIAL INJECTION**
- Fast sequential injection determination of benzo[a]pyrene using variable angle fluorescence with on-line solid-phase extraction, 451
- Sequential injection spectrophotometric determination of oxybenzone in lipsticks, 1462
- SEROTONIN**
- Multimembrane carbon fiber microelectrodes for amperometric determination of serotonin in human urine, 495
- SERUM**
- Biological sample analysis with immunoaffinity solid-phase microextraction, 1456
- SEWAGE**
- Investigations of the origins of estrogenic A-ring aromatic steroids in UK sewage treatment works effluents, 285
- Determination of linear alkylbenzene sulfonates and their polar carboxylic degradation products in sewage treatment plants by automated solid-phase extraction followed by capillary electrophoresis-mass spectrometry, 825
- Determination of dialkyldimethylammonium surfactants in sewage based on the formation of premicellar aggregates, 2230
- SEWAGE SLUDGE**
- Metal fractionation in olive oil and urban sewage sludges using the three-stage BCR sequential extraction method and microwave single extractions, 1304
- SHAH CONVOLUTION**
- Characterisation of Shah convolution Fourier transform detection, 1640
- SIDEROPHORES**
- Electrospray ionisation-mass spectrometry of hydroxamate siderophores, 1359
- SILICA NANOPARTICLES**
- Biochemically functionalized silica nanoparticles, 1274
- SILICATES**
- Thorium isotopic measurements on silicate rock samples with a multi-collector inductively coupled plasma mass spectrometer, 1707
- Simultaneous determination of phosphate and silicate in detergents and waters by first-derivative spectrophotometry, 1810
- SILICON**
- High surface density immobilization of oligonucleotide on silicon, 485
- SILVER**
- Silver(I) ion-selective membrane based on Schiff base-*p-tert*-butylcalix[4]arene, 505
- S<sub>2</sub>O<sub>2</sub> donor cyclic and acyclic ionophores: Potentiometric sensing for Ag(I) and a new nitrate-bridged dimeric Ag(I) complex of the acyclic ionophore with an unusual structure, 1773
- SIZE-EXCLUSION CHROMATOGRAPHY**
- Determination of free and total sulfate and phosphate in glycosaminoglycans by column-switching high-performance size-exclusion and ion chromatography and single-column ion chromatography, 169
- Copper fractionation by SEC-HPLC and ETAAS: Study of breast milk and infant formulae whey used in lactation of full-term newborn infants, 571
- SODIUM**
- High-resolution determination of H<sup>+</sup> by ion chromatography. Application to the simultaneous determination of H<sup>+</sup>, Na<sup>+</sup>, NH<sub>4</sub><sup>+</sup> and K<sup>+</sup> in acid rain, 821
- SOIL**
- Development of a procedure for measuring nitrogen by cold neutron prompt gamma-ray activation analysis, 217
- Microwave-assisted extraction of monomethyl arsonic acid from soil and sediment standard reference materials, 1511
- Development of SdFFF-ETAAS for characterising soil and sediment colloids, 1588
- Development of a glass ampoule system for evaluation of long-term sorption/desorption behavior of vapor phase volatile organic compounds in geosorbents, 1816
- Application of artificial neural networks to the classification of soils from São Paulo state using near-infrared spectroscopy, 2194
- SOL**
- Disposable, stable media for reproducible surface-enhanced Raman spectroscopy, 1
- SOLID PHASE**
- Analysis of single polymer beads for solid phase combinatorial synthesis: the determination of reactive thiol and within batch polydispersity of bead loadings, 538
- SOLID PHASE EXTRACTION**
- Tris(2,2'-bipyridine)ruthenium (II) electrogenerated chemiluminescence of alkaloid type drugs with solid phase extraction sample preparation, 37
- Fast sequential injection determination of benzo[a]pyrene using variable angle fluorescence with on-line solid-phase extraction, 451
- Investigation of water environments in a C18 bonded silica phase using <sup>1</sup>H magic angle spinning (MAS) nuclear magnetic resonance (NMR) spectroscopy, 548
- Automated on-line in-tube solid-phase microextraction followed by liquid chromatography/electrospray ionization-mass spectrometry for the determination of chlorinated phenoxy acid herbicides in environmental waters, 602
- Determination of linear alkylbenzene sulfonates and their polar carboxylic degradation products in sewage treatment plants by automated solid-phase extraction followed by capillary electrophoresis-mass spectrometry, 825
- Simultaneous optimization of the solid-phase extraction of organochlorine and organophosphorus pesticides using the desirability function, 1005
- Simultaneous determination of Cd(II), Cu(II) and Pb(II) in surface waters by solid phase extraction and flow injection analysis with spectrophotometric detection, 1149
- Biological sample analysis with immunoaffinity solid-phase microextraction, 1456
- Simultaneous determination of ammonia, aliphatic amines, aromatic amines and phenols at  $\mu\text{g l}^{-1}$  levels in environmental waters by solid-phase extraction of their benzoyl derivatives and gas chromatography-mass spectrometry, 1663
- Determination of aliphatic amines in water by liquid chromatography using solid-phase extraction cartridges for preconcentration and derivatization, 1683
- Trace level analysis of polycyclic aromatic hydrocarbons in surface waters by solid phase extraction (SPE) and gas chromatography-ion trap mass spectrometry (GC-ITMS), 1974
- SOLID PHASE MICROEXTRACTION**
- Development of an SPME/ATR-IR chemical sensor for detection of phenol type compounds in aqueous solutions, 881
- Formation of artefacts during air analysis of volatile amines by solid-phase microextraction, 1969
- SOLUBILISED RECEPTOR**
- The preparation, solubilisation and binding characteristics of a  $\beta_2$ -adrenoceptor isolated from transfected Chinese hamster cells, 491
- SOLVENT EXTRACTION**
- An evaluation of extraction techniques for arsenic species from freeze-dried apple samples, 136
- Arsenic extraction and speciation in carrots using accelerated solvent extraction, liquid chromatography and plasma mass spectrometry, 1011
- SONICATION**
- An evaluation of extraction techniques for arsenic species from freeze-dried apple samples, 136
- SONO-SQUARE WAVE STRIPPING VOLTAMMETRY**
- The electroanalytical detection and determination of copper in heavily passivating media: ultrasonically enhanced solvent extraction by *N*-benzoyl-*N*-phenyl-hydroxylamine in ethyl acetate coupled with electrochemical detection by sono-square wave stripping voltammetry analysis, 2025
- SORPTION**
- Development of a glass ampoule system for evaluation of long-term sorption/desorption behavior of vapor phase volatile organic compounds in geosorbents, 1816
- SPATIAL INTERACTIONS**
- Systematic study of steric and spatial contributions to molecular recognition by non-covalent imprinted polymers, 793
- SPECIATION**
- Separation and preconcentration of Mn<sup>VII</sup>/Mn<sup>II</sup> speciation on crosslinked chitosan and determination by flame atomic absorption spectrometry, 239
- An optimised single-reagent method for the speciation of chromium by flame atomic absorption spectrometry based on surfactant micelle-mediated methodology, 389
- Application of central composite designs for optimisation of the chromatographic separation of monomethylarsonate and dimethylarsinate and of selenomethionine and selenite by ion-pair chromatography coupled with plasma mass spectrometric detection, 594
- Speciation and preconcentration of vanadium(V) and vanadium(IV) in water samples by flow injection-inductively coupled plasma optical emission spectrometry and ultrasonic nebulization, 715
- A robust multi-syringe system for process flow analysis. Part 3. Time based injection applied to the spectrophotometric determination of nickel(II) and iron speciation, 903

- Potential for the speciation of Zn using fast protein liquid chromatography (FPLC) and convective interaction media (CIM) fast monolithic chromatography with FAAS and electrospray (ES)-MS-MS detection, 1346
- Microwave-assisted extraction of monomethyl arsonic acid from soil and sediment standard reference materials, 1511
- Artefacts in the speciation of sulfides in anoxic sediments, 1805
- SPECTROELECTROCHEMISTRY**
- Spectroelectrochemical study of the oxidative doping of polydialkylphenyleneethynylene using iterative target transformation factor analysis, 508
- SPECTROFLUORIMETRY**
- Homogeneous liquid-liquid extraction method for the selective spectrofluorimetric determination of trace amounts of tryptophan, 703
- Study of the reaction of proteins with Beryllon II-A<sup>III</sup> by the Rayleigh light scattering technique and its application, 707
- Highly sensitive spectrofluorimetric determination of trace amounts of lead with a new fluorescent reagent, 1164
- 2-hydroxy-1-naphthaldehyde-8-aminoquinoline, 1164
- Specific fluorescence determination of lithium ion based on 2-(2-hydroxyphenyl)benzoxazole, 1499
- SPECTROMETRY**
- A novel sample decomposition technique at atmospheric pressure for the determination of Os abundances in iron meteorites using isotope dilution inductively coupled plasma-mass spectrometry, 846
- Phenolics in selected European hardwood species by liquid chromatography-electrospray ionisation mass spectrometry, 1535
- SPECTROPHOTOMETRY**
- Use of the correct blank test in the determination of COD and AOX in bleached kraft mill D stage effluents, 127
- Flow injection manifold for the direct spectrophotometric determination of bismuth in pharmaceutical products using Methylthymol Blue as a chromogenic reagent, 247
- Study of the spectrophotometric analysis of protein solution with *p*-iodochlorophosphonazo as adsorbate by the microphase adsorption-spectral correction technique, 528
- Monoparameter sensors for the determination of the antioxidants butylated hydroxyanisole and *n*-propyl gallate in foods and cosmetics by flow injection spectrophotometry, 897
- A robust multi-syringe system for process flow analysis. Part 3. Time based injection applied to the spectrophotometric determination of nickel(II) and iron speciation, 903
- Sustained prediction ability of net analyte preprocessing methods using reduced calibration sets. Theoretical and experimental study involving the spectrophotometric analysis of multicomponent mixtures, 1105
- Multi-component kinetic-spectrophotometric analysis. Selection of wavelength and time ranges, 1135
- Simultaneous determination of Cd(II), Cu(II) and Pb(II) in surface waters by solid phase extraction and flow injection analysis with spectrophotometric detection, 1149
- Spectrophotometric determination of trace molybdenum in plants and seeds with 3,5-dibromo-4-hydroxyphenylfluorone, 1154
- 1-(2-hydroxy-3-methoxybenzylideneamino)-8-hydroxynaphthalene-3,6-disulfonic acid as a reagent for the spectrophotometric determination of boron in ceramic materials, 1160
- Spectrophotometric determination of trace aluminium content in parenteral solutions by combined cloud point preconcentration-flow injection analysis, 1172
- Study of the absorption spectra of the 4f electron transitions of the praseodymium complex with ciprofloxacin and its analytical application, 1440
- Sequential injection spectrophotometric determination of oxybenzone in lipsticks, 1462
- Spectrophotometric bioanalytical flow-injection system for control of hemodialysis treatment, 1564
- Rapid flow injection spectrophotometric determination of monofluorophosphates in toothpastes after on-line hydrolysis by alkaline phosphatase immobilized on a cellulose nitrate membrane, 1608
- Simultaneous determination of phosphate and silicate in detergents and waters by first-derivative spectrophotometry, 1810
- o*-Dianisidine: a new reagent for selective spectrophotometric, flow injection determination of chlorine, 2087
- Determination of dialkyldimethylammonium surfactants in sewage based on the formation of premicellar aggregates, 2230
- SPECTROSCOPY**
- Embossed polymer leaky waveguide devices for spectroscopic analysis, 1293
- High temperature reversed-phase HPLC using deuterium oxide as a mobile phase for the separation of model pharmaceuticals with multiple on-line spectroscopic analysis (UV, IR, <sup>1</sup>H-NMR and MS), 1625
- SQUALENE**
- Determination of aliphatic alcohols, squalene,  $\alpha$ -tocopherol and sterols in olive oils: direct method involving gas chromatography of the unsaponifiable fraction following silylation, 472
- STABILITY CONSTANTS**
- Obtaining the 'best values' of stability constants: the protonation constants of five thioether carboxylates as a case study, 2093
- STANDARD REFERENCE MATERIAL**
- Microwave-assisted extraction of monomethyl arsonic acid from soil and sediment standard reference materials, 1511
- STATISTICS**
- A new test for 'sufficient homogeneity', 1414
- Optimisation and validation of a capillary electrophoresis method for the simultaneous determination of diazepam and otilonium bromide, 1700
- A comparison of simple statistical methods for estimating analytical uncertainty, taking into account predicted frequency distributions, 2044
- Factor transformation to produce statistics describing the uncertainty of analytical data, 2053
- Statistical and probabilistic approaches to confidence intervals of linear calibration in liquid chromatography, 2061
- STEEL**
- Determination of molybdenum in steel by adsorptive stripping voltammetry in a homogeneous ternary solvent system, 892
- STERIC INTERACTIONS**
- Systematic study of steric and spatial contributions to molecular recognition by non-covalent imprinted polymers, 793
- STERIOD**
- Towards the development of molecularly imprinted artificial receptors for the screening of estrogenic chemicals, 760
- STEROL**
- Determination of aliphatic alcohols, squalene,  $\alpha$ -tocopherol and sterols in olive oils: direct method involving gas chromatography of the unsaponifiable fraction following silylation, 472
- STOICHIOMETRY**
- Determination of the stoichiometry of Cu<sub>2</sub>In<sub>2</sub>Se<sub>2</sub> by total-reflection XRF, 1797
- STOPPED-FLOW**
- Fluorimetric determination of total ascorbic acid by a stopped-flow mixing technique, 1436
- STRIPPING VOLTAMMETRY**
- Determination of molybdenum in steel by adsorptive stripping voltammetry in a homogeneous ternary solvent system, 892
- SUGARS**
- Enzymatic reactions for the determination of sugars in food samples using the differential pH technique, 2149
- SULFATE**
- Determination of free and total sulfate and phosphate in glycosaminoglycans by column-switching high-performance size-exclusion and ion chromatography and single-column ion chromatography, 169
- SULFIDE**
- Artefacts in the speciation of sulfides in anoxic sediments, 1805
- SULFITE**
- Electrochemical titrations of thiosulfate, sulfite, dichromate and permanganate using dual microband electrodes, 86
- Potentiometric titrations using dual microband electrodes, 1882
- SULFONATED NAPHTHALENES**
- Rapid determination of sulfonated naphthalenes and their formaldehyde condensates in aqueous environmental samples using synchronous excitation fluorimetry, 2072
- SULFUR**
- Coupling of organic elemental analysis with flame photometry for sulfur determination at the nanogram level, 1820
- X-ray fluorescence spectrometric determination of sulfur-containing anionic surfactants in water after their enrichment on a membrane filter as an ion-pair complex with a cationic surfactant, 2078
- SULFUR DIOXIDE**
- Determination of sulfur dioxide in vitriol plant wastewater by using a polyNiMe<sub>2</sub>TAA electrochemically modified Pt microelectrode, 669
- SUPERCritical FLUID EXTRACTION**
- Determination of fat in leather by the use of supercritical fluid extraction combined with on-line piezoelectric detection, 938
- Recent extraction techniques for solid matrices—supercritical fluid extraction, pressurized fluid extraction and microwave-assisted extraction: their potential and pitfalls, 1182

- SURFACE ANALYSIS**
- Molecular patterning on carbon based surfaces through photobiotin activation, 195
- SURFACE-ENHANCED RAMAN SPECTROSCOPY**
- Disposable, stable media for reproducible surface-enhanced Raman spectroscopy, 1
- SURFACE PLASMON RESONANCE**
- Enhanced surface plasmon resonance immunosensing using a streptavidin-biotinylated protein complex, 4
- High-throughput screening using the surface plasmon resonance effect of colloidal gold nanoparticles, 1645

**SURFACTANT**

Altering the selectivity of inorganic anion separations using electrostatic capillary electrophoresis, 28  
 Determination of dialkyltrimethylammonium surfactants in sewage based on the formation of premicellar aggregates, 2230

**TANDEM MASS SPECTROMETRY**

Gas chromatographic determination of pesticides in vegetable samples by sequential positive and negative chemical ionization and tandem mass spectrometric fragmentation using an ion trap analyser, 46  
 Determination of diphenylamine stabilizer and its nitrated derivatives in smokeless gunpowder using a tandem MS method, 480  
 Determination of phytochelatin by capillary zone electrophoresis with electrospray tandem mass spectrometry detection (CZE-ES MS/MS), 624  
 Investigation of arsenic speciation in oyster test reference material by multidimensional HPLC-ICP-MS and electrospray tandem mass spectrometry (ES-MS-MS), 1055  
 Monitoring of 6-chloronicotinic acid in human urine by gas chromatography-tandem mass spectrometry as indicator of exposure to the pesticide imidacloprid, 1355  
 Detection of aflatoxins (G<sub>1-2</sub>, B<sub>1-2</sub>), sterigmatocystin, citrinine and ochratoxin A in samples contaminated by microbes, 1545  
 Development and validation of a method for the confirmation of nicarbazine in chicken liver and eggs using LC-electrospray MS-MS according to the revised EU criteria for veterinary drug residue analysis, 1985  
 Direct simultaneous analysis of plasma samples for a drug discovery compound and its hydroxyl metabolite using mixed-function column liquid chromatography-tandem mass spectrometry, 2139  
 Development and validation of a liquid chromatography-electrospray tandem mass spectrometry method for mebendazole and its metabolites hydroxymebendazole and aminomebendazole in sheep liver, 2144

**TELLURIUM**

Determination of tellurium in indium antimonide semiconductor material by electrothermal atomic absorption spectrometry, 1449

**TEMPLATE MOLECULE**

Evaluation of methods aimed at complete removal of template from molecularly imprinted polymers, 784

**TETRACYCLINE**

Sensitive detection of tetracyclines using europium-sensitized fluorescence with EDTA as co-ligand and cetyltrimethylammonium chloride as surfactant, 694

**THERMOMETRIC DETECTION**

Flow injection analysis of mercury(II) based on enzyme inhibition and thermometric detection, 1612

**THIN FILM**

Integration of microfabricated needle-type glucose sensor devices with a novel thin-film Ag/AgCl electrode and plasma-polymerized thin film: mass production techniques, 658

**THIOETHER CARBOXYLATES**

Obtaining the 'best values' of stability constants: the protonation constants of five thioether carboxylates as a case study, 2093

**THIOSULFATE**

Electrochemical titrations of thiosulfate, sulfite, dichromate and permanganate using dual microband electrodes, 86

Potentiometric titrations using dual microband electrodes, 1882

**THIOUREA**

Vapour phase Fourier transform infrared spectrometric determination of thiourea, 1432

**THORIUM**

Thorium isotopic measurements on silicate rock samples with a multi-collector inductively coupled plasma mass spectrometer, 1707

**TITRIMETRY**

Electrochemical titrations of thiosulfate, sulfite, dichromate and permanganate using dual microband electrodes, 86

Potentiometric titrations using dual microband electrodes, 1882

**TOOTH PASTE**

Rapid flow injection spectrophotometric determination of monofluorophosphates in toothpastes after on-line hydrolysis by alkaline phosphatase immobilized on a cellulose nitrate membrane, 1608

**TOTAL POLYPHENOL INDEX**

Simultaneous (or sequential) determination of the total polyphenol index (or I<sub>250</sub>) and density in wines by flow injection, 251

**TOXICOLOGY**

Optimised uncertainty at minimum overall cost to achieve fitness-for-purpose in food analysis, 1777

**TRACE ANALYSIS**

Development of an LC/MS method for the trace analysis of hexamethylenetriperoxidodiamine (HMTD), 1689

Trace level analysis of polycyclic aromatic hydrocarbons in surface waters by solid phase extraction (SPE) and gas chromatography-ion trap mass spectrometry (GC-ITMS), 1974

**TRANSISTOR**

An integrated relay/nitrate reductase field-effect transistor for the sensing of nitrate (NO<sub>3</sub><sup>-</sup>), 652

**TRENBOLONE**

Sensor chip preparation and assay construction for immunobiosensor determination of beta-agonists and hormones, 1721

**TRIACYLGLYCEROL**

Regiospecific characterisation of the triacylglycerols in animal fats using high performance liquid chromatography-atmospheric pressure chemical ionisation mass spectrometry, 1018

Quick regiospecific analysis of fatty acids in triacylglycerols with GC using 1,3-specific lipase in butanol, 1032

**TRIAZINE**

Determination of measurement uncertainty for the determination of triazines in groundwater from validation data, 211

**TRIPROPYLAMINE**

Electrochemiluminescence of tris(2,2'-bipyridine)ruthenium(II) immobilized in poly(*p*-styrenesulfonate)-silica-Triton X-100 composite thin-films, 1095

**TRYPTOPHAN**

Homogeneous liquid-liquid extraction method for the selective spectrofluorimetric determination of trace amounts of tryptophan, 703

**ULTRA-TRACE ANALYSIS**

Selective ultra-trace detection of NO and NO<sub>2</sub> in complex gas mixtures using broad-bandwidth REMPI mass spectrometry, 1221

**ULTRASONIC NEBULIZATION**

Speciation and preconcentration of vanadium(V) and vanadium(IV) in water samples by flow injection-inductively coupled plasma optical emission spectrometry and ultrasonic nebulization, 715

**ULTRAVIOLET-VISIBLE SPECTROPHOTOMETRY**

Determination of the content and identity of lidocaine solutions with UV-visible spectroscopy and multivariate calibration, 1142

**UNCERTAINTY**

Optimised uncertainty at minimum overall cost to achieve fitness-for-purpose in food analysis, 1777

Modelling measurement uncertainty as a function of concentration: an example from a contaminated land investigation, 1784

A comparison of simple statistical methods for estimating analytical uncertainty, taking into account predicted frequency distributions, 1, 2044

Factor transformation to produce statistics describing the uncertainty of analytical data, 2053

**URANIUM**

Determination of U-236 in sediment samples by accelerator mass spectrometry, 633

**UREA**

Spectrophotometric bioanalytical flow-injection system for control of hemodialysis treatment, 1564

**URIC ACID**

Covalent modification of glassy carbon electrode with glutamic acid for simultaneous determination of uric acid and ascorbic acid, 367

**URINE**

Fluorimetric determination of isatin in human urine and serum by liquid chromatography postcolumn photoirradiation, 33

Determination of low concentrations of benzene in urine using multi-dimensional gas chromatography, 41

Continuous and stopped flow injection for catalytic determination of total iodine in urine, 121

Quantification and validation of enzyme immunoassay for urinary aflatoxin B<sub>1</sub>-N<sup>7</sup>-guanine adduct for biological monitoring of aflatoxins, 179

N-Isobutyloxycarbonylation for improved detection of 3'-hydroxystanzolol and its 17-epimer in doping control, 306

On-column amperometric detection of ofloxacin and pasiniazid in urine by capillary electrophoresis with an improved fractured joint and small detection cell, 441

Exposure to 4,4'-methylenediphenyl diisocyanate (MDI) during moulding of rigid polyurethane foam: determination of airborne MDI and urinary 4,4'-methylenedianiline (MDA), 476

Sensitive determination of methylenedioxylated amphetamines by liquid chromatography, 581

Exposure to 2,4- and 2,6-toluene diisocyanate (TDI) during production of flexible foam: determination of airborne TDI and urinary 2,4- and 2,6-toluenediamine (TDA), 1025

Negative ion chemical ionization GC/MS-MS analysis of dialkylphosphate metabolites of organophosphate pesticides in urine of non-occupationally exposed subjects, 1037

Preliminary studies of a fast screening method for cocaine and cocaine metabolites in urine using hollow fibre membrane solvent microextraction (HFMSME), 1298

Monitoring of 6-chloronicotinic acid in human urine by gas chromatography-tandem mass spectrometry as indicator of exposure to the pesticide imidacloprid, 1355

Reagentless chemiluminescence flow sensor for the determination of riboflavin in pharmaceutical preparations and human urine, 1393

**VALIDATION**

Separation and determination of denatured caseins by hydrophobic interaction chromatography Part II. Method validation and applications, 995

**VANADIUM**

Speciation and preconcentration of vanadium(V) and vanadium(IV) in water samples by flow injection-inductively coupled plasma optical emission spectrometry and ultrasonic nebulization, 715

# VARIABLE ANGLE FLUORESCENCE

Fast sequential injection determination of benzo[a]pyrene using variable angle fluorescence with on-line solid-phase extraction, 451

# VEGETABLE

Gas chromatographic determination of pesticides in vegetable samples by sequential positive and negative chemical ionization and tandem mass spectrometric fragmentation using an ion trap analyser, 46

Multiresidue analysis of pesticides in vegetables and fruits using two-layered column with graphitized carbon and water absorbent polymer, 1529

# VELLUM

Mediaeval cantors in the Valladolid Biblioteca : FT-Raman spectroscopic study, 383

# VETERINARY

Development and validation of a method for the confirmation of nizarbazin in chicken liver and eggs using LC-electrospray MS-MS according to the revised EU criteria for veterinary drug residue analysis, 1985

Development and validation of a liquid chromatography-electrospray tandem mass spectrometry method for mebendazole and its metabolites hydroxymebendazole and aminomebendazole in sheep liver, 2144

# VINEGAR

Two-parameter determination in vinegar by a flow injection-pervaporation system, 1177

# VIRGINIAMYCIN

Development and validation of a method for the determination of sub-additive levels of virginiamycin in compound animal feeds by liquid chromatography, 1332

# VOLATILE ORGANIC COMPOUNDS

Development of an analytical technique and stability evaluation of 143 C<sub>1</sub>-C<sub>12</sub> volatile organic compounds in Summa® canisters by gas chromatography-mass spectrometry, 310

A new method for analysis of coke on catalysts, 1669

Development of a glass ampoule system for evaluation of long-term sorption/desorption behavior of vapor phase volatile organic compounds in geosorbents, 1816

# VOLTAMMETRY

Electroanalytical exploitation of quinone-thiol interactions: application to the selective determination of cysteine, 353

Differential-pulse voltammetric determination of trace formaldehyde using magnetic microspheres and magnetic electrode, 676

Methylene blue as an electrochemical discriminator of single- and double-stranded oligonucleotides immobilised on gold substrates, 1756

Separation of anodic peaks of ascorbic acid and dopamine at an  $\alpha$ -alanine covalently modified glassy carbon electrode, 1760

Electrochemistry of iron oxide pigments (earths) from pictorial microsamples attached to graphite-polyester composite electrodes, 1764

Zeolite-membrane modulation of simple and facilitated ion transfer, 1857

Voltammetric investigation of hair dye constituents: application to the quantification of *p*-phenylenediamine, 1897

# WATER

Measurement of <sup>237</sup>Np in environmental water samples by accelerator mass spectrometry, 58

Multivariate data analysis of quality parameters in drinking water, 91

Determination of measurement uncertainty for the determination of triazines in groundwater from validation data, 211

International Measurement Evaluation Programme: IMEP-9, trace elements in water, 228

Determination of acetonitrile and ethanol in water by guided microwave spectroscopy with multivariate calibration, 417

Fast sequential injection determination of benzo[a]pyrene using variable angle fluorescence with on-line solid-phase extraction, 451

Headspace gas chromatographic determination of 2-alkyl-5,5-dimethyl-1,3-dioxane derivatives in wastewaters of a polyester resin plant, 469

Determination of manganese in water samples by flame atomic absorption spectrometry after cloud point extraction, 534

Investigation of water environments in a C18 bonded silica phase using <sup>1</sup>H magic angle spinning (MAS) nuclear magnetic resonance (NMR) spectroscopy, 548

A novel ion chromatographic method based on cation-exchange and acid-base interactions for the simultaneous determination of total alkalinity and monovalent cations in samples of  $\mu$ l volume, 555

Simultaneous ion-exclusion chromatography and cation-exchange chromatography of anions and cations in environmental water samples on a weakly acidic cation-exchange resin by elution with pyridine-2,6-dicarboxylic acid, 567

Automated on-line in-tube solid-phase microextraction followed by liquid chromatography/electrospray ionization-mass spectrometry for the determination of chlorinated phenoxy acid herbicides in environmental waters, 602

Determination of sulfur dioxide in vitriol plant wastewater by using a polyNiMe<sub>2</sub>TAA electrochemically modified Pt microelectrode, 669

Improved fluorimetric determination of dissolved aluminium by micelle-enhanced lumogallion complex in natural waters, 698

Molecularly imprinted polymer sensors for pesticide and insecticide detection in water, 798

The determination of six taste and odour compounds in water using Ambersorb 572 and high resolution mass spectrometry, 840

Field sample preconcentration of copper in sea water using chelating minicolumns subsequently incorporated on a flow-injection-flame atomic absorption spectrometry system, 933

Simultaneous determination of Cd(II), Cu(II) and Pb(II) in surface waters by solid phase extraction and flow injection analysis with spectrophotometric detection, 1149

Large-volume sample stacking for on-capillary sample enrichment in the determination of naphthalene- and benzenesulfonates in real water samples by capillary zone electrophoresis, 1312

Speciation of aluminium(III) in natural waters using differential pulse voltammetry with a Pyrocatechol Violet-modified electrode, 1404

The response of a membrane inlet ion mobility spectrometer to chlorine and the effect of water contamination of the drying media on ion mobility spectrometric responses to chlorine, 1539

Redox voltammetry of sub-parts per billion levels of Cu<sup>2+</sup> at polyaspartate-modified gold electrodes, 1573

Determination of trace amounts of off-flavor compounds in drinking water by stir bar sorptive extraction and thermal desorption GC-MS, 1652

Determination of organochlorine pesticides in river water by gas chromatography-negative-ion chemical-ionization mass spectrometry using large volume injection, 1658

Simultaneous determination of ammonia, aliphatic amines, aromatic amines and phenols at  $\mu$ g l<sup>-1</sup> levels in environmental waters by solid-phase extraction of their benzoyl derivatives and gas chromatography-mass spectrometry, 1663

Determination of aliphatic amines in water by liquid chromatography using solid-phase extraction cartridges for preconcentration and derivatization, 1683

Simultaneous determination of phosphate and silicate in detergents and waters by first-derivative spectrophotometry, 1810

Development of a glass ampoule system for evaluation of long-term sorption/desorption behavior of vapor phase volatile organic compounds in geosorbents, 1816

Two OPEEs (organic phase enzyme electrodes) used to check the percentage water content in hydrophobic foods and drugs, 1923

Micro sequential injection: environmental monitoring of nitrogen and phosphate in water using a "Lab-on-Valve" system furnished with a microcolumn, 1947

Trace level analysis of polycyclic aromatic hydrocarbons in surface waters by solid phase extraction (SPE) and gas chromatography-ion trap mass spectrometry (GC-ITMS), 1974

X-ray fluorescence spectrometric determination of sulfur-containing anionic surfactants in water after their enrichment on a membrane filter as an ion-pair complex with a cationic surfactant, 2078

# WINE

Simultaneous (or sequential) determination of the total polyphenol index (or I<sub>250</sub>) and density in wines by flow injection, 251

Determination of biogenic amines in wine by multidimensional liquid chromatography with online derivatization, 2124

# X-RAY DIFFRACTION

Quantitative determination of binary and tertiary calcium carbonate mixtures using powder X-ray diffraction, 1118

Determination of indomethacin polymorphic contents by chemometric near-infrared spectroscopy and conventional powder X-ray diffraction, 1578

# X-RAY FLUORESCENCE SPECTROMETRY

Determination of the stoichiometry of Cu, In, Se, by total-reflection XRF, 1797

X-ray fluorescence spectrometric determination of sulfur-containing anionic surfactants in water after their enrichment on a membrane filter as an ion-pair complex with a cationic surfactant, 2078

# X-RAY PHOTOELECTRON SPECTROSCOPY

High surface density immobilization of oligonucleotide on silicon, 485

Spectroscopic analysis of the tribological behavior of a model boundary layer lubricant, 1269

Microstructural and surface characterization of solid state sensor based on LaFeO<sub>3-x</sub> oxide for detection of NO<sub>2</sub>, 1377

Electrochemical and spectroscopic characterization of quinone functionalized exfoliated graphite, 1872

# ZEOLITES

Non-aqueous potentiometry using zeolites, 733

# ZINC

Potential for the speciation of Zn using fast protein liquid chromatography (FPLC) and convective interaction media (CIM) fast monolithic chromatography with FAAS and electrospray (ES)-MS-MS detection, 1346

Determination of Ba, Cd, Cu, Pb and Zn in saliva by isotope dilution direct injection inductively coupled plasma mass spectrometry, 1363

Nanocomposite electrodes made of carbon nanofibers and black wax. Anodic stripping voltammetry of zinc and lead, 1878

Determination of the complex stability of zinc with carbonic anhydrase in sea-water, 2036

# ZIRCONIUM

Carbon paste electrode for trace zirconium(IV) determination by adsorption voltammetry, 2032
